Treatise On Instrumentation Dover S On Music:

Treatise on Instrumentation Hector Berlioz, Richard Strauss, 2013-07-24 This influential work appraises the musical qualities and potential of over 60 stringed wind and percussion instruments Includes 150 full score musical examples from works by Berlioz Mozart Beethoven Wagner others Foreword by Richard Strauss *Treatise on Instrumentation* Hector Berlioz, Richard Strauss, 1985-03 [The Oxford Handbook of Mobile Music Studies, Volume 2](#) Sumanth Gopinath, Jason Stanyek, 2014-03 The two volumes of *The Oxford Handbook of Mobile Music Studies* consolidate an area of scholarly inquiry that addresses how mechanical electrical and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile portable fungible and ubiquitous At once a marketing term a common mode of everyday life performance and an instigator of experimental aesthetics mobile music opens up a space for studying the momentous transformations in the production distribution consumption and experience of music and sound that took place between the late nineteenth and the early twenty first centuries Taken together the two volumes cover a large swath of the world the US the UK Japan Brazil Germany Turkey Mexico France China Jamaica Iraq the Philippines India Sweden and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility Volume 2 investigates the ramifications of mobile music technologies on musical sonic performance and aesthetics Two core arguments are that mobility is not the same thing as actual movement and that artistic production cannot be absolutely sundered from the performances of quotidian life The volume s chapters investigate the mobilization of frequency range by sirens and miniature speakers sound vehicles such as boom cars ice cream trucks and trains the gestural choreographies of soundwalk pieces and mundane interactions with digital media dance music practices in laptop and iPod DJing the imagery of iPod commercials production practices in Turkish political music and black popular music the aesthetics of handheld video games and chiptune music and the mobile device as a new musical instrument and resource for musical ensembles *Musical Gestures* Rolf Inge Godøy, Marc Leman, 2010-02-12 *Musical Gestures* is a collection of essays that explore the relationship between sound and movement The book takes an interdisciplinary approach to the fundamental issues of this subject drawing on ideas theories and methods from disciplines such as musicology music perception and human movement science **The Power of Music** Roger Kennedy, 2020-07-31 Emotion is an integral aspect of musical experience music has the power to take us on an emotional and intellectual journey transforming the listener along the way The aim of this book is to examine the nature of this journey using a variety of perspectives No one discipline can do justice to music s complexity if one is to have a sense of the whole musical experience even if one has to break up the whole experience into various elements for the purposes of clarification The issues raised have some relationship to psychoanalytic understanding and listening as after all psychoanalysis is a listening discipline its bedrock is listening to the patient s communications While of course there are significant differences between understanding of and listening to a musical performance and a patient in a consulting room

the book explores common ground Evidence from neuroscience indicates that music acts on a number of different brain sites and that the brain is likely to be hard wired for musical perception and appreciation and this offers some kind of neurological substrate for musical experiences or a parallel mode of explanation for music s multiple effects on individuals and groups After various excursions into early mother baby experiences evolutionary speculations and neuroscientific findings the book s main emphasis is that it is the intensity of the artistic vision which is responsible for music s power That intense vision invites the viewer or the listener into the orbit of the work engaging us to respond to the particular vision in an essentially intersubjective relationship between the work and the observer or listener This is the area of what we might call the human soul Music can be described as having soul when it hits the emotional core of the listener And of course there is soul music whose basic rhythms reach deep into the body to create a powerful feeling of aliveness One can truly say that music of all the arts is most able to give shape to the elusive human subject or soul

Consuming Music Together Kenton O'Hara, Barry Brown, 2006-07-09 Listening to buying and sharing music is an immensely important part of everyday life Yet recent technological developments are increasingly changing how we use and consume music This book collects together the most recent studies of music consumption and new developments in music technology It combines the perspectives of both social scientists and technology designers uncovering how new music technologies are actually being used along with discussions of new music technologies still in development With a specific focus on the social nature of music the book breaks new ground in bringing together discussions of both the social and technological aspects of music use Chapters cover topics such as the use of the iPod music technologies which encourage social interaction in public places and music sharing on the internet A valuable collection for anyone concerned with the future of music technology this book will be of particular interest to those designing new music technologies those working in the music industry along with students of music and new technology
