Hogan, 2016-12-16 New geophysical techniques multibeam echo sounding and 3D seismics have revolutionized high resolution imaging of the modern seafloor and palaeo shelf surfaces in Arctic and Antarctic waters generating vast quantities of data and novel insights into sedimentary architecture and past environmental conditions The Atlas of Submarine Glacial Landforms is a comprehensive and timely summary of the current state of knowledge of these high latitude glacier influenced systems The Atlas presents over 180 contributions describing illustrating and discussing the full variability of landforms found on the high latitude glacier influenced seafloor from fjords and continental shelves to the continental slope rise and deep sea basins beyond The distribution and geometry of these submarine landforms provide key information on past ice sheet extent and the direction and nature of ice flow and dynamics The papers discuss individual seafloor landforms landform assemblages and entire landsystems from relatively mild to extreme glacial marine climatic settings and on timescales from the modern margins of tidewater glaciers through Quaternary examples to ancient glaciations in the Late Ordovician Recent Landform Evolution Denes Loczy, Miloš Stankoviansky, Adam Kotarba, 2012-01-02 The Carpatho Balkan Geomorphological Commission and the International Association of Geomorphologists IAG Carpatho Balkan Dinaric Regional Working Group promote networking between researchers and the exchange of research experience Following a brief introduction into the geology climate hydrology and land cover of the Carpatho Balkan Dinaric region the book provides detailed information on research applying both traditional and innovative techniques and summarizes contemporary knowledge on recent geomorphic processes It also presents studies of exogenic geomorphic processes from each country The chapters on Poland the Czech Republic Slovakia Ukraine Hungary Romania Slovenia Croatia Serbia Bulgaria and Macedonia examine the geomorphic processes in shaping the topography of each country This volume also examines key geomorphic processes influencing land use and economic activities as well as contributions discussing processes under climate change
