TRIGGER POINT PAIN PATTERNS – Travell and Simons

Trigger point pain patterns are a common clinical finding in the physical therapist. They are characterized by a localized area of muscle tenderness, which may be associated with a specific posture or activity. The pain is often described as a sharp, stabbing pain, and it may be reproduced by palpation of the trigger point. The pain may also be referred to other parts of the body, depending on the location of the trigger point. The following diagrams illustrate the pain patterns associated with trigger points in the head and neck, shoulder, thorax, and arm.
