Beh, 2013-10-18 The overall aim of this volume is to present the research studies carried out in the Middle East and Asia in the fields of culture and gender and their influence on leadership in particular The cultures and practices of these geographical regions are very much varied and this book Culture and Gender in Leadership Perspectives from the Middle East and Asia brings together analyses of these themes in selected countries of these two regions The chapter authors use detailed descriptions case studies and vignettes to speak to the cultural relativism and gender in leadership in these countries and provide a unique and comparative perspective drawn from their own cultures This volume also contributes to the development of theory and empirical research found in these regions and through the collective efforts presented in this book attempts to strengthen the body of knowledge and practice in the fields of culture and gender in leadership As Asia is becoming the engine of economic growth for the world and Arab Spring is opening up new vistas in the Middle East this book is a must read Cultural Hermeneutics Roger Standing, 2023-10-31 How do Christians go about understanding their cultural context in twenty first century Britain What is the relationship between faith and the culture in which it is lived Considering the most formative influences for people of faith in our culture and the forces at play in competing for their attention Cultural Hermeneutics equips those in ministry and those in formation for roles within the church to better read the times in which they serve *Metamodern Leadership* James Surwillo, 2017-07-11 Metamodern Leadership outlines the seven values that identify the character of our future leaders based on the circumstances that make the Millennial Generation who they are It is at once an attempt to implore youth to seize their potential by tying their values to ancient wisdom as well as a warning to everyone else to understand the impacts of disregarding the inevitable tendencies of a very distinct new demographic This is the untold story of the personal

responsibility required of the Millennial Generation against the messaging and memes that portray them as entitled and lazy. It is an optimistic and pragmatic interpretation on the leadership mandates in the near future. The ancient virtue of leadership required broad knowledge as the basis for critical thinking and self examination. The late twentieth century required myopic versions of leadership which neglected the truths of centuries of wisdom. Our younger generations will lead and follow based on new foundations that seem counterintuitive to most yet will be the status quo within a decade. This distinction will lead to pragmatism and problem solving for the future rather than the dogma and gridlock of today. We will require a generation of leaders who can once again link the complexities of the future with the ancient wisdom of progress.

Developing Theory Through Qualitative Inquiry Johnny Saldana, 2024-02-07. This unique text shows researchers how to develop theories derived through qualitative inquiry. Johnny Salda illustrates how a theory is a research based statement with an accompanying explicating narrative that contains six properties: concepts, propositional logic, parameters, variation, explanation, causation, generalizability, transferability, and the improvement of social life. The book features hundreds of examples of theories and metatheories from a wide range of disciplines and includes end of chapter activities for exercising the skills necessary to develop original theories. Just as Salda demystifies coding and qualitative data analysis in his bestselling Sage books, *Developing Theory Through Qualitative Inquiry* presents an accessible introduction to the principles and methods of theorizing for social insight.

Teaching Japan: A Handbook Ioannis Gaitanidis, Gregory Poole, 2025-10-01. This book aims to offer ideas and examples of pedagogy in the undergraduate classroom. The basic premise taken by the authors begins with a question: What if stereotypes surrounding Japan were not pushed to the margins in teaching but took center stage and were exposed for the multiple ways that they can be used to learn not only about Japan but of various scholarly disciplines? The task then becomes constructing ways to challenge essentialist notions that do not seek merely to deny but to shift the conversation constructively by encouraging engagement with a theoretical field from which to acquire tools to critically and effectively evaluate stereotypes of Japan or other societies. The result is a collection of carefully crafted case studies of syllabi that showcase pedagogies aimed at the deconstruction of concepts such as Japan, Japanese, or Japanese society while at the same time offering skills of inquiry that transcend the topics being deconstructed. This handbook is a source of ideas from colleagues in a variety of disciplinary and institutional settings who are tackling the same issues. Current or future teachers who plan to use case studies from Japan in their lectures.

The Realities of 'Reality' - Part III: Impacts of Speed and Time Optimization on Reality Fritz Dufour, MBA, DESS, 2019-08-28. The main theme of this book is the impacts of speed and time optimization on reality or more precisely on our modern society. But first it sets the background by exploring the physics behind the concepts of speed and time how they

came about how we became aware of them and how did the new world of speed emerge and why does it seem to be inescapable It explores the speed of light and the speed of sound by linking them to our environment It introduces the notion of Arrow of time or entropy which grows from the past to the present is expected to keep growing in the future and hypothesizes that this is perhaps why our craving for speed and time optimization is here to stay with no end in sight An important point discussed is that because of memories and experiences people may choose to live either in the past present or future which leads to the notions of presentism and eternalism The book argues that while for presentists only the present is real for eternalists both the past present and future are equally real The book makes the case about speed and time optimization as a legacy of modernity by laying out the differences between modernism modernization and modernity itself It shows how modernity is all about the now or the present rather than the past and how as such it is all about the new So then the changes that are now happening in our modern world can be traced back to a segment of history that dates back to the beginning of modernity that is which began with the Protestant Reformation and is now rapidly approaching closure in the world of today's extreme finance It argues about the technological implications of speed and time in the 21st century It shows how technology has become an integral part of human existence and that it is inconceivable one can even think of escaping it This Part III of the series shows the link between high speed trading and faster connectivity and faster computers It shows how thanks to the Internet information became freely accessible and is spreading faster and faster It shows how supercomputers not only allow people to address the biggest and most complex problems they also allow people to solve problems faster even those that could fit on servers or clusters of PCs This rapid time to solution is critical in some aspects of emergency preparedness and national defense where the solutions produced are only valuable if they can be acted on in a timely manner Finally the social and psychological implications of speed and time in the 21st century are also addressed by considering the upside and the downside of moving fast meaning leading a fast paced life The argument presented in the book is based on the analysis and the importance of stress in our daily lives and also explains the notion of chronobiology Our biological clocks drive our circadian rhythms An interesting point is that blind people may not perceive time the same way as the non blind Furthermore the book shows how we perceive time differently as we age compared to when we were young It also makes the case for the perception of time in dreams and in real life Speed and time optimization may be deceiving according to this Part III of the series This can be proven by questions such as 1 Is going over the speed limit really worth it and 2 Is the saying Slow down to go faster a paradox [Qualitative Pathways for Publication](#) Carol Isaac, 2024-12-24

Qualitative research cultivates exploratory ways of thinking that can serve as a vehicle to disseminate findings for researchers scientists and principal investigators However publishing requires an understanding of theoretical foundations Researchers may know to use interviews as a method but failing to explicate theory risks reviewer rejection Multitasking scholars need a succinct nuts and bolts approach This book synthesizes major qualitative scholarship and translates it to

scientists and researchers to achieve pathways to publication While succinct this book is not rudimentary There is a minimum amount researchers need to know to get qualitative research published to read write and cite This book supports scientists goal oriented approach to translate scientific research into tangible benefits improve quality of life enhance efficiency and solve practical problems faced by individuals and communities Imaginative Methodologies in the Social Sciences Michael Hviid Jacobsen,Michael S. Drake,Anders Petersen,2017-05-15 Imaginative Methodologies in the Social Sciences develops expands and challenges conventional social scientific methodology and language by way of literary poetic and other alternative sources of inspiration as sociologists social workers anthropologists criminologists and psychologists all rethink provoke and reignite social scientific methodology Challenging the mainstream orthodoxy of social scientific methodology which closely guards the boundaries between the social sciences and the arts and humanities this volume reveals that authors and artists are often engaged in projects parallel to those of the social sciences and vice versa thus demonstrating that artistic and cultural production does not necessarily constitute a specialist field but is in fact integral to social reality As such it will be of interest to scholars and students in the social sciences and across the arts and humanities working on the philosophy of social science methodology social theory creativity poetics pedagogy and other related topics
