The Song Of The Dodo Island Biogeography In An Age Of Extinction:

The Song of the Dodo David Quammen,1997-04-14 Takes a close up look at island biogeography the science of the geographic distribution of life on islands and its significance in terms of evolution and extinction **The Song of the Dodo** David Quammen,1924-12 Over the past eight years David Quammen has followed the threads of island biogeography on a globe encircling journey of discovery **The Song of the Dodo** David Quammen,1997 Interweaving personal observation scientific theory and history this beautifully written book takes the reader on a globe spanning tour of wild places and ideas An epic adventure of the mind and spirit Robert Kanigel The New York Times Book Review Maps **The Anthropology of Extinction** Genese Marie Sodikoff,2012 The Anthropology of Extinction offers compelling explorations of issues of widespread concern *The Oxford Handbook of Ecocriticism* Greg Garrard,2014 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard s subversive uses of the pastoral John Clare s sacred relationship with the land Thoreau s profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovitch Michael Clayton and Al Gore s An Inconvenient Truth **Vertebrate Biology** Donald W. Linzey,2012-02-13 Arranged logically to follow the typical course format Vertebrate Biology leaves students with a full understanding of the unique structure function and living patterns of the subphylum that includes our own species

Geography Of Islands Stephen A. Royle,2002-09-11 First Published in 2004 Islands have always fascinated people They often seem remote and mysterious set between the continents on which most people live Indeed many people choose islands for their perfect holiday idyll In practice however the everyday social and economic reality is often very different A Geography of Islands firstly examines the differing ways islands are formed Despite the uniqueness of such islands in terms of shape size flora and fauna and also their economic and developmental profiles they all share certain characteristics and constraints imposed by their insularity These present islands everywhere with a range of common problems A Geography of Islands considers how their small scale isolation peripherality and often a lack of resources has affected islands in the

present day and their past It considers and discusses population issues communications and services island politics and new ways of making a living especially tourism found within contemporary island geography A Geography of Islands gives a comprehensive survey of islandness and its defining features Stephen A Royle has visited and studied 320 islands in 50 countries in all the world s oceans It is full of up to date global case studies from Okinawa to Inishbofin and Hawaii to Crete In the final chapter all the themes are brought together in a case study of the Atlantic island of St Helena It is well illustrated with the author s own photographs and maps This book will appeal to those studying islands as well as those with an interest in the topic particularly those engaged in dealing with small island economies **A Primer on Human Impacts on the**

Environment Liam Heneghan,2023-03-14 An insightful and illuminating discussion of the impact humans have had on Earth In A Primer on Human Impacts on the Environment The Conceptual Approach distinguished environmental scientist Liam Heneghan explores the intricate relationships between humanity and Earth in an accessible and engaging style Replete with real world examples and drawing from classic and contemporary scholarship the author adapts the fundamental conceptual models of the environmental disciplines to assess the risks human beings are taking with their home planet The conceptual approach of this primer challenges readers to think across multiple disciplines to reveal the big picture that is all too often lost in the details of contemporary environmental studies Readers will also find A thorough introduction to conceptual modeling showing how systems models can be adapted and applied in a rapidly changing world Comprehensive explorations of the human impact on the Earth including an examination of possible ecological limits and planetary boundaries In depth evaluations of environmental risks especially though not limited to climate change and biodiversity loss A guide to contemplating catastrophic risk and the potential for societal collapse without inducing unnecessary anxiety An interdisciplinary focus emphasizing the role of the natural and social sciences as well as the arts and humanistic disciplines in safeguarding the future Perfect for students of environmental science and environmental studies A Primer on Human Impacts on the Environment will also earn a place in the libraries of graduate students working on environmental themes and practicing professionals in the environmental management community **A Natural History of the Future** Rob

Dunn,2021-11-09 An arresting vision of this relentless natural world New York Times Book Review A leading ecologist argues that if humankind is to survive on a fragile planet we must understand and obey its iron laws Our species has amassed unprecedented knowledge of nature which we have tried to use to seize control of life and bend the planet to our will In A Natural History of the Future biologist Rob Dunn argues that such efforts are futile We may see ourselves as life s overlords but we are instead at its mercy In the evolution of antibiotic resistance the power of natural selection to create biodiversity and even the surprising life of the London Underground Dunn finds laws of life that no human activity can annul When we create artificial islands of crops dump toxic waste or build communities we provide new materials for old laws to shape Life s future flourishing is not in question Ours is As ambitious as Edward Wilson s Sociobiology and as timely as Elizabeth Kolbert

s The Sixth Extinction A Natural History of the Future sets a new standard for understanding the diversity and destiny of life itself *A World in a Shell* Thom van Dooren, 2023-10-17 Following the trails of Hawai i s snails to explore the simultaneously biological and cultural significance of extinction In this time of extinctions the humble snail rarely gets a mention And yet snails are disappearing faster than any other species In *A World in a Shell* Thom van Dooren offers a collection of snail stories from Hawai i once home to more than 750 species of land snails almost two thirds of which are now gone Following snail trails through forests laboratories museums and even a military training facility and meeting with scientists and Native Hawaiians van Dooren explores ongoing processes of ecological and cultural loss as they are woven through with possibilities for hope care mourning and resilience Van Dooren recounts the fascinating history of snail decline in the Hawaiian Islands from deforestation for agriculture timber and more through the nineteenth century shell collecting mania of missionary settlers and on to the contemporary impacts of introduced predators Along the way he asks how both snail loss and conservation efforts have been tangled up with larger processes of colonization militarization and globalization These snail stories provide a potent window into ongoing global process of environmental and cultural change including the largely unnoticed disappearance of countless snails insects and other less charismatic species Ultimately van Dooren seeks to cultivate a sense of wonder and appreciation for our damaged planet revealing the world of possibilities and relationships that lies coiled within a snail s shell

The Woodhen Clifford Frith, 2013-06-12 This book tells the fascinating success story of saving the

flightless Woodhen of Lord Howe Island This unique large rail an iconic and highly endangered Australian bird was at the very brink of extinction with just 15 individuals found in 1980 when bold and risky actions were taken to save it The book begins with the discovery and ecology of Lord Howe Island It then details the history of the Woodhen its place among the rails and their evolution of flightlessness the planning implementation and trials tribulations and successes of the captive breeding programme and the way in which the wild population recovered The ecology behaviour and breeding biology of this unique flightless island rail are also discussed The text is accompanied by numerous photographs and drawings This is a story of survival yet the bird remains highly endangered as it is under constant potential threat which could tip it over the brink and to extinction The Woodhen provides gripping insights into the potential for both losing and saving vertebrate species Winner of a 2014 Whitley Awards Certificate of Commendation for Historical Zoology

Ecocollapse Fiction and Cultures of Human Extinction Sarah E. McFarland, 2021-01-28 This work analyzes 21st century realistic speculations of human extinction fictions that imagine future worlds without interventions of as yet uninvented technology interplanetary travel or other science fiction elements that provide hope for rescue or long term survival Climate change fiction as a genre of apocalyptic and post apocalyptic writing usually resists facing the potentiality of human species extinction following instead traditional generic conventions that imagine primitivist communities of human survivors with the means of escaping the consequences of global climate change Yet amidst the ongoing sixth great extinction works that problematize survival provide no opportunities for social rebirth and speculate humanity s final end may address the problem of how to reject the impulse of human exceptionalism that pervades climate change discourse and post apocalyptic fiction Rather than following the preferences of the genre the ecocollapse fictions examined here manifest apocalypse where the means for a happy ending no longer exists In these texts diminished ecosystems specters of cannibalism and disintegrations of difference and othering render human self identity as radically malleable within their confrontations with the stark materiality of all life This book is the first in depth exploration of contemporary fictions that imagine the imbrication of human and nonhuman within global species extinctions It closely interrogates novels from authors like Peter Heller Cormac McCarthy and Yann Martel that reject the impulse of human exceptionalism to demonstrate what it might be like to go extinct

Animal Welfare and International Environmental Law Werner Scholtz, 2019 At a time when the planet s wildlife faces countless dangers international environmental law continues to overlook its evolving welfare interests This thought provoking book provides a crucial exploration of how international environmental law must adapt to take account of the growing recognition of the intrinsic value of wildlife

The Triumph of Human Empire Rosalind Williams, 2022-12-22 In the early 1600s in a haunting tale titled New Atlantis Sir Francis Bacon imagined the discovery of an uncharted island This island was home to the descendants of the lost realm of Atlantis who had organized themselves to seek the knowledge of Causes

and secret motions of things and the enlarging of the bounds of Human Empire to the effecting of all things possible Bacon's make believe island was not an empire in the usual sense marked by territorial control instead it was the center of a vast general expansion of human knowledge and power Rosalind Williams uses Bacon's island as a jumping off point to explore the overarching historical event of our time the rise and triumph of human empire the apotheosis of the modern ambition to increase knowledge and power in order to achieve world domination Confronting an intensely humanized world was a singular event of consciousness which Williams explores through the lives and works of three writers of the late nineteenth century Jules Verne William Morris and Robert Louis Stevenson As the century drew to a close these writers were unhappy with the direction in which their world seemed to be headed and worried that organized humanity would use knowledge and power for unworthy ends In response Williams shows each engaged in a lifelong quest to make a home in the midst of human empire to transcend it and most of all to understand it They accomplished this first by taking to the water in life and in art the transition from land to water offered them release from the condition of human domination At the same time each writer transformed his world by exploring the literary boundary between realism and romance Williams shows how Verne Morris and Stevenson experimented with romance and fantasy and how these traditions allowed them to express their growing awareness of the need for a new relationship between humans and Earth The Triumph of Human Empire shows that for these writers and their readers romance was an exceptionally powerful way of grappling with the political technical and environmental situations of modernity As environmental consciousness rises in our time along with evidence that our seeming control over nature is pathological and unpredictable Williams's history is one that speaks very much to the present

The Island of the Colorblind Oliver Sacks, 2012-11-14 Part travelogue part autobiography part medical mystery this moving book by the poet laureate of medicine The New York Times and bestselling author of Awakenings takes us to a tiny Pacific atoll and the island of Guam to explore the genesis of disease the wonders of botany and the complexities of being human Sacks's total immersion in island life makes this luminous beautifully written report a wondrous voyage of discovery As a travel writer Sacks ranks with Paul Theroux and Bruce Chatwin As an investigator of the mind's mysteries he is in a class by himself Publishers Weekly For Oliver Sacks islands conjure up equally the romance of Melville and Stevenson the adventure of Magellan and Cook and the scientific wonder of Darwin and Wallace Drawn to the tiny Pacific atoll of Pingelap by intriguing reports of an isolated community of islanders born totally color blind Sacks finds himself setting up a clinic in a one room island dispensary where he listens to these achromatopic islanders describe their colorless world in rich terms of pattern and tone luminance and shadow And on Guam where he goes to investigate the puzzling neurodegenerative paralysis endemic there for a century he becomes for a brief time an island neurologist making house calls with his colleague John Steele amid crowing cockerels cycad jungles and the remains of a colonial culture Out of this unexpected journey Sacks has woven an unforgettable narrative which immerses us in the romance of island life and shares his own compelling vision of the
