The Spread Of Nuclear Weapons A Debate Renewed 2nd Second Edition:

The Stupidity of War John Mueller, 2021-03-04 It could be said that American foreign policy since 1945 has been one long miscue most international threats including during the Cold War have been substantially exaggerated The result has been agony and bloviation unnecessary and costly military interventions that have mostly failed A policy of complacency and appeasement likely would have worked better In this highly readable book John Mueller argues with wisdom and wit rather than ideology and hyperbole that aversion to international war has had considerable consequences There has seldom been significant danger of major war Nuclear weapons international institutions and America s super power role have been substantially irrelevant post Cold War policy has been animated more by vast proclamation and half vast execution than by the appeals of liberal hegemony and post 9 11 concerns about international terrorism and nuclear proliferation have been overwrought and often destructive Meanwhile threats from Russia China Iran and North Korea or from cyber technology are limited and manageable Unlikely to charm Washington Mueller explains how when international war is in decline complacency and appeasement become viable diplomatic devices and a large military is scarcely required *Perspectives*

on Sino-American Strategic Nuclear Issues C. Twomey, 2008-06-23 Sino American nuclear relations are critical given ongoing modernization efforts on both sides and an increasingly complex regional and global nuclear environment This volume pairs Chinese and American authors together to offer national perspectives on contemporary nuclear issues **The Challenges**

Changing Patterns of Warfare between India and Pakistan Rizwana Abbasi, Muhammad Saeed Uzzaman, 2023-05-12 Changing Patterns of Warfare between India and Pakistan analyzes how advanced nuclear technologies and the advent of disruptive technologies have affected the evolving conflict between India and Pakistan Advanced nuclear technologies such as nuclear submarines aircraft carriers ballistic missile defence systems BMDs multiple independently targetable re entry vehicles MIRVs anti satellite weapons ASAT and disruptive technologies such as hypersonic weapons artificial intelligence AI lethal autonomous weapons LAWS unmanned aerial vehicles UAVs drones and space based and cyber technologies have all complicated crisis dynamics and the domain of warfare in the region Further the employment of India's compellence strategy is an indication of a change in its stance that demonstrates smart surgical strikes are now more likely The phenomenon of surgical strikes raises the question of how disruptive technologies will be used to gain direct indirect military control and hence challenge the existing status quo and deterrence stability Against this backdrop the authors predict how this conflict may develop in the future and evaluate the ways to stabilize deterrence and regulate the militarization of artificial intelligence and disruptive technologies between India and Pakistan This book will be of interest to all those researching and working in the fields of security studies strategic studies nuclear policy deterrence thinking and proliferation non proliferation aspects of the nuclear weapons programme within South Asia and beyond It will also be relevant for the academic community policy makers diplomats members of international non governmental organizations INGOs professional research institutes and organizations working on India Pakistan relations

The United Kingdom and Nuclear Deterrence Jeremy Stocker, 2013-05-13 In December 2003 the British government announced that within a few years it would need to take decisions about the future of Britain's strategic nuclear deterrent Exactly three years later its plans were revealed in a White Paper The existing Trident system is to be given a life extension which includes building new submarines to carry the missiles costing 15 20 billion Britain has a substantial nuclear legacy having owned nuclear weapons for over half a century The strategic context for the deterrent has changed completely with the end of the Cold War but nuclear weapons retain much of their salience This Adelphi Paper argues that it makes sense to remain a nuclear power in an uncertain and nuclear armed world Given that deterrence needs are now less acute but more complex than in the past the paper asserts that deterrence also needs to be aligned with non proliferation policies which seek to

reduce the scale of threats that need to be deterred Somewhat overlooked in current policy are appropriate measures of defence which can raise the nuclear threshold and if required mitigate the effects of deterrence failure It concludes that the government s decisions about the future form of the deterrent are very sensible but cautions that they still need to be integrated into a broader policy that embraces diplomacy deterrence and defence to counter the risks posed by nuclear proliferation

Leveraging Latency Tristan A. Volpe,2023 In Leveraging Latency Tristan A Volpe explores how weak nations compel concessions from superpowers by threatening to acquire atomic weapons Volpe finds that there is a trade off between threatening proliferation and promising nuclear restraint States need just enough bomb making capacity to threaten proliferation but not so much that it becomes too difficult for them to offer nonproliferation assurances Including four comparative case studies and identifying a generalizable mechanism the threat assurance tradeoff Volpe provides a systematic assessment of the coercive utility of nuclear technology

Combating Weapons of Mass Destruction Nathan E. Busch,Daniel Joyner,2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials

Better Safe Than Sorry Michael Krepon,2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other s worst fears about the Bomb And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9 11 Our worst fears still could be realized at any time but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb Major powers have less use for the Bomb than at any time in the

past Thus despite wars crises and Murphy s Law the dark shadows cast by nuclear weapons can continue to recede Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration s pursuit of a war of choice in Iraq based on false assumptions Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration s denigration of diplomacy deterrence containment and arms control As he sees it The United States has stumbled before but America has also made it through hard times and rebounded With wisdom persistence and luck another dark passage can be successfully navigated

State Behavior and the Nuclear Nonproliferation Regime Jeffrey R. Fields, 2014-10-15 This is the first book length study of why states sometimes ignore oppose or undermine elements of the nuclear nonproliferation regime even as they formally support it Anchored by the Treaty on the Non Proliferation of Nuclear Weapons the nuclear nonproliferation regime is the constellation of agreements initiatives and norms that work in concert to regulate nuclear material and technology The essays gathered here show that attitudes on nonproliferation depend on a complex contingent decision calculus as states continually gauge how their actions within the regime will affect trade regional standing and other interests vital to any nation The first four essays take theoretical approaches to such topics as a framework for understanding challenges to collective action clandestine proliferation under the Bush and Obama administrations and its impact on regime legitimacy threat construction as a lens through which to view resistance to nonproliferation measures and the debate over the relationship between nuclear disarmament and nonproliferation Essays comprising the second part of the book use regional and state specific case studies to look at how U S security guarantees affect the willingness of states to support the regime question the perceived spoiler role of a vocal minority within the Non Aligned Movement challenge notions that Russia is using the regime to build a coalition hostile to the United States contrast nonproliferation strategies among Latin American countries and explain the lag in adoption of an Additional Protocol by some Middle East and North African countries Getting countries to cooperate on nonproliferation efforts is an ongoing challenge These essays show that success must be measured not only by how many states join the effort but also by how they participate once they join
