The Stork And The Plow The Equity Answer To The Human Dilemma:

The Stork and the Plow Paul R. Ehrlich, 1995 *The Stork and the Plow* Paul R. Ehrlich, Anne H. Ehrlich, Gretchen C. Daily, 1997-01-01 In this provocative book the authors look at the interaction between population and food supply and offer a powerful and radical strategy for balancing human numbers with nutritional needs Their proposals include improving the status of women reducing racism and religious prejudice reforming the agricultural system and shrinking the growing gap between rich and poor This ambitious enlightened handbook is a cornucopia of strategies and ideas for concerned citizens and policymakers Publishers Weekly Give equal education and power to women throughout the world argue the authors when that happens birth rates fall and food supplies go up San Francisco Chronicle Best Bets of 1995 The book can help us understand the past and possible future of the meals most Westerners take for granted Bill McKibben New York Review of Books A well reasoned account of how poverty forces unsustainable use of natural resources a careful and balanced treatment of developments in agriculture that may help food production to stay ahead of population growth Basia Zaba Nature This generation faces a set of challenges unprecedented in their scope and severity and in the shortness of time left to resolve them The Stork and the Plow sets these out thoughtfully and accurately We can all hope this urgent message is carefully heeded Henry W Kendall Nobel laureate and Julius A Stratton Professor of Physics MIT A wonderful piece of work Partha Dasgupta American Scientist *Inherit the Holy Mountain* Mark Stoll, 2015-04-30 In *Inherit the Holy Mountain* historian Mark Stoll introduces us to the religious roots of the American environmental movement Religion he shows provided environmentalists both with deeply embedded moral and cultural ways of viewing the world and with content direction and tone for the causes they espoused Stoll discovers that specific denominational origins corresponded with characteristic sets of ideas about nature and the environment as well as distinctive aesthetic reactions to nature as can be seen in key works of art analyzed throughout the book Stoll also provides insight into the possible future of environmentalism in the United States concluding with an examination of the current religious scene and what it portends for the future By debunking the supposed divide between religion and American environmentalism *Inherit the Holy Mountain* opens up a fundamentally new narrative in environmental studies *Psychology of Sustainable Development* Peter Schmuck, P. Wesley Schultz, 2002-04-30 This text clarifies the meaning of sustainable development and describes the conditions necessary for it to occur **Life and Work** Charles Birch, 2003 To get higher profits we need to work harder and longer Right Wrong In this original book Charles Birch and David Paul look at the working lives of employees managers and executives and propose a new agenda for achieving a work life balance If companies get their relationships with employees and customers right profits will follow as a matter of course But too many organisations focus only on the short term bottom line and are insensitive to the emotional and spiritual needs and dignity of employees back cover **Our Common Denominator** Christoph Antweiler, 2016-04-01 Since the politicization of anthropology in the 1970s most anthropologists have been reluctant to

approach the topic of universals that is phenomena that occur regularly in all known human societies In this volume Christoph Antweiler reasserts the importance of these cross cultural commonalities for anthropological research and for life and co existence beyond the academy The question presented here is how anthropology can help us approach humanity in its entirety understanding the world less as a globe with an emphasis on differences but as a planet from a vantage point open to commonalities *Divided Planet* Tom Athanasiou,1998 Global warming Soil loss Freshwater scarcity Extinction Overconsumption Toxic waste production Habitat and biodiversity erosion These are only a few of our most urgent ecological crises There are others as well and despite the popularity of good news environmentalism few of them are going away In this wide ranging grimly entertaining commentary on the environmental debate Tom Athanasiou finds that these problems are exacerbated if not caused by the planet s division into warring camps of rich and poor Writing with passionate intelligence Athanasiou proposes a simple yet radical solution stop indulging easy calming fantasies in which everything seems to change but nothing important changes at all Instead do what needs to be done now while there is still time and goodwill The bottom line he concludes is that there will be no sustainability without a large measure of justice Without profound political and economic change he argues there can be no effective global environmental action no real effort to save the planet

Encyclopedia of Global Population and Demographics James Ciment,Immanuel Ness,2014-01-21 This up to date and comprehensive encyclopedia focuses on the population in each of the 194 countries of the world Emphasis is on the world s population at the end of the twentieth century and on predictions for the next fifty years This will be the authoritative source of information for students scholars librarians government officials and journalists [Fifty Key Thinkers on the Environment](#) Joy A. Palmer,David E. Cooper,David Cooper,2002-09-11 Fifty Key Thinkers on the Environment is a unique guide to environmental thinking through the ages Joy A Palmer herself an important and prolific author on environmental matters has assembled a team of thirty five expert contributors to summarize and analyse the thinking of fifty diverse and stimulating figures from all over the world and from ancient times to the present day Among those included are Philosophers such as Rousseau Spinoza and Heidegger Activists such as Chico Mendes Literary giants such as Virgil Goethe and Wordsworth Major religious and spiritual figures such as the Buddha and St Francis of Assisi Lucid scholarly and informative these fifty essays offer a fascinating overview of mankind s view and understanding of the physical world **The Dominant Animal** Paul R. Ehrlich,Anne H. Ehrlich,2008-06-30 In humanity s more than 100 000 year history we have evolved from vulnerable creatures clawing sustenance from Earth to a sophisticated global society manipulating every inch of it In short we have become the dominant animal Why then are we creating a world that threatens our own species What can we do to change the current trajectory toward more climate change increased famine and epidemic disease Renowned Stanford scientists Paul R Ehrlich and Anne H Ehrlich believe that intelligently addressing those questions depends on a clear understanding of how we evolved and how and why we re changing the planet in ways that darken our descendants future The Dominant Animal arms

readers with that knowledge tracing the interplay between environmental change and genetic and cultural evolution since the dawn of humanity In lucid and engaging prose they describe how Homo sapiens adapted to their surroundings eventually developing the vibrant cultures vast scientific knowledge and technological wizardry we know today But the Ehrlichs also explore the flip side of this triumphant story of innovation and conquest As we clear forests to raise crops and build cities lace the continents with highways and create chemicals never before seen in nature we may be undermining our own supremacy The threats of environmental damage are clear from the daily headlines but the outcome is far from destined Humanity can again adapt if we learn from our evolutionary past Those lessons are crystallized in The Dominant Animal Tackling the fundamental challenge of the human predicament Paul and Anne Ehrlich offer a vivid and unique exploration of our origins our evolution and our future

Key Thinkers on the Environment Joy A. Palmer Cooper, David E. Cooper, 2017-09-14 Key Thinkers on the Environment is a unique guide to environmental thinking through the ages Joy A. O. Wilson Lucid scholarly and informative the essays contained within this volume offer a fascinating overview of humankind's view and understanding of the natural world

Black Sea In Crisis, The: Symposium II - An Encounter Of Beliefs: A Single Objective Sarah Hobson, Laurence David Mee, 1999-01-25 This book is a record of the proceedings of a remarkable symposium that took place on the Black Sea in September 1997 It was held under the auspices of The Ecumenical Patriarch His All Holiness Bartholomew I and His Excellency Mr Jacques Santer President of the European Commission It was the second in a series of symposia on the theme of Religion Science and the Environment The first symposium entitled Revelation and the Environment took place on the Aegean Sea in 1995 to celebrate the 1900th anniversary of the Book of the Apocalypse Over a period of ten days more than 400 distinguished scientists environmentalists religious leaders and policy makers from 35 countries discussed the environmental problems facing the Black Sea a unique environment sadly degraded by the imprint of humankind and causing profound changes in the economy and life style of the 160 million people in the area The book offers ideas to help restore the environmental balance of this much threatened region At the same time it looks at the Black Sea as a paradigm for the world's closed sea problems and demonstrates the value and potential of an integrated approach to global environmental stewardship

Constant Battles Steven A. LeBlanc, Katherine E. Register, 2013-07-23 With armed conflict in the Persian Gulf now upon us Harvard archaeologist Steven LeBlanc takes a long term view of the nature and roots of war presenting a controversial thesis The notion of the noble savage living in peace with one another and in

harmony with nature is a fantasy In *Constant Battles The Myth of the Peaceful Noble Savage* LeBlanc contends that warfare and violent conflict have existed throughout human history and that humans have never lived in ecological balance with nature The start of the second major U S military action in the Persian Gulf combined with regular headlines about spiraling environmental destruction would tempt anyone to conclude that humankind is fast approaching a catastrophic end But as LeBlanc brilliantly argues the archaeological record shows that the warfare and ecological destruction we find today fit into patterns of human behavior that have gone on for millions of years *Constant Battles* surveys human history in terms of social organization from hunter gatherers to tribal agriculturalists to more complex societies LeBlanc takes the reader on his own digs around the world from New Guinea to the Southwestern U S to Turkey to show how he has come to discover warfare everywhere at every time His own fieldwork combined with his archaeological ethnographic and historical research presents a riveting account of how throughout human history people always have outgrown the carrying capacity of their environment which has led to war Ultimately though LeBlanc s point of view is reassuring and optimistic As he explains the roots of warfare in human history he also demonstrates that warfare today has far less impact than it did in the past He also argues that as awareness of these patterns and the advantages of modern technology increase so does our ability to avoid war in the future

Global Environmental History Ian G Simmons, 2008-03-05 Courses which deal with environmental history have long lacked a comprehensive overview I G Simmons has made a significant contribution with a book that looks at the long term history of environment and humanity from 10 000 BC to AD 2000 This far reaching text considers the global picture and recognises the contributions of many disciplines including the natural sciences the social sciences and increasingly the humanities As a starting point this book takes the major phases of human technological evolution of the last 12 000 years and considers how these have affected the natural world It then considers the response to conditions such as climate change putting today s preoccupations into a long term perspective This is a book of history not prophecy and so makes no judgements on current anxieties

Botanists and Zoologists Dean Miller, 2014-01-01 In this volume a breakdown of the life and work of some of history s pioneers in the study of plants and animals are thoroughly explored It provides excellent biographical sketches for trailblazers in the sciences Articles are devoted to specific scientists covering their contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience This volume covers names from around the world and throughout the centuries with a chapter specifically devoted to the top scientific contributors of the 21st century

Nature's Services Gretchen Cara Daily, 2012-09-26 Life itself as well as the entire human economy depends on goods and services provided by earth s natural systems The processes of cleansing recycling and renewal along with goods such as seafood forage and timber are worth many trillions of dollars annually and nothing could live without them Yet growing human impacts on the environment are profoundly disrupting the functioning of natural systems and imperiling the delivery of these services *Nature s Services* brings together world

renowned scientists from a variety of disciplines to examine the character and value of ecosystem services the damage that has been done to them and the consequent implications for human society Contributors including Paul R Ehrlich Donald Kennedy Pamela A Matson Robert Costanza Gary Paul Nabhan Jane Lubchenco Sandra Postel and Norman Myers present a detailed synthesis of our current understanding of a suite of ecosystem services and a preliminary assessment of their economic value Chapters consider major services including climate regulation soil fertility pollination and pest control philosophical and economic issues of valuation case studies of specific ecosystems and services implication of recent findings and steps that must be taken to address the most pressing concerns Nature s Services represents one of the first efforts by scientists to provide an overview of the many benefits and services that nature offers to people and the extent to which we are all vitally dependent on those services The book enhances our understanding of the value of the natural systems that surround us and can play an essential role in encouraging greater efforts to protect the earth s basic life support systems before it is too late

Earth's Growing Population Chris Reiter, 2012-01-15 Provides comprehensive information on population growth and its effects on the environment

Social Psychology and Evaluation Melvin M. Mark, Stewart Ian Donaldson, Bernadette Campbell, 2011-05-04 This compelling work brings together leading social psychologists and evaluators to explore the intersection of these two fields and how their theory practices and research findings can enhance each other An ideal professional reference or student text the book examines how social psychological knowledge can serve as the basis for theory driven evaluation facilitate more effective partnerships with stakeholders and policy makers and help evaluators ask more effective questions about behavior Also identified are ways in which real world evaluation findings can identify gaps in social psychological theory and test and improve the validity of social psychological findings for example in the areas of cooperation competition and intergroup relations The volume includes a useful glossary of both fields terms and offers practical suggestions for fostering cross fertilization in research graduate training and employment opportunities Each tightly edited chapter features an introduction and concluding reflection discussion questions from the editors
