Education Rebecca L. Young, 2022-11-14 Climate Change Education Reimagining the Future with Alternative Forms of Storytelling offers innovative approaches to teaching about climate change through storytelling forms that appeal to today's students: climate fiction and protest poetry, fiction and documentary films, video games and social media. The stories are used as exemplars from exploring space debris to urban design, planning to fast fashion, and they provide entry points for investigating particular aspects of climate science including the local and global impacts of a warming planet. Each chapter provides analyses and strategies for fostering climate and space literacy through knowledge, empathy, and agency. Contributors from around the world encourage educators to answer students' calls for comprehensive K-12 climate education by aligning pedagogy with real-world challenges in order to prepare students who understand the myriad injustices of the climate crisis and feel empowered to confront them. They share their own stories and urge educators to join the growing hopeful movement for action classroom by classroom.

Literature as a Lens for Climate Change Rebecca L. Young, 2022-03-03 Each chapter in this collection offers a practical approach for using literature to engage and empower students to confront aspects of climate crises. Educators from different backgrounds and parts of the world share their experience using novels, short stories, drama, poetry, and nonfiction to help students understand the causes and consequences of climate change as well as how they can contribute to potential solutions.

Old Mars George R. R. Martin, Gardner Dozois, 2013-10-08 Fifteen all-new stories by science fiction's top talents collected by bestselling author George R. R. Martin and multiple award-winning editor Gardner Dozois. Burroughs's A Princess of Mars, Bradbury's The Martian Chronicles, Heinlein's Red Planet. These and so many more inspired generations of readers with a sense that science fiction's greatest wonders did not necessarily lie far in the future or light years across the galaxy but were to be found right now on a nearby world tantalizingly similar to our own: a red planet that burned like an ember in our night sky and in our imaginations. This new anthology of fifteen all-original science fiction stories edited by George R. R. Martin and Gardner Dozois celebrates the Golden Age of Science Fiction, an era filled with tales of interplanetary colonization and derring-do. Before the advent of powerful telescopes and space probes, our solar system could be imagined as teeming with strange life forms and ancient civilizations by no means always friendly to the dominant species of Earth. And of all the planets orbiting that G-class star we call the Sun, none was so steeped in an aura of romantic decadence, thrilling mystery, and gung-ho adventure as Mars. Join such seminal contributors as Michael Moorcock, Mike Resnick, Joe R. Lansdale, S. M. Stirling, Mary Rosenblum, Ian McDonald, Liz Williams, James S. A. Corey, and others in this brilliant retro anthology that turns its back on the cold, all-but-airless Mars of the Mariner probes and instead embraces an older, more welcoming, more exotic Mars: a planet of ancient canals cutting through red deserts studded with the ruined cities of dying races.

FEATURING ALL NEW STORIES BY James S. A. Corey, Phyllis Eisenstein, Matthew Hughes, Joe R. Lansdale, David D.
