Assembly Rules and Restoration Ecology Vicky M. Temperton,Richard J. Hobbs,Tim Nuttle,Stefan Halle,2013-04-10

Understanding how ecosystems are assembled how the species that make up a particular biological community arrive in an area survive and interact with other species is key to successfully restoring degraded ecosystems Yet little attention has been paid to the idea of assembly rules in ecological restoration in both the scientific literature and in on the ground restoration efforts **Assembly Rules and Restoration Ecology** edited by Vicky M Temperton Richard J Hobbs Tim Nuttle and Stefan Halle addresses that shortcoming offering an introduction overview and synthesis of the potential role of assembly rules theory in restoration ecology It brings together information and ideas relating to ecosystem assembly in a restoration context and includes material from a wide geographic range and a variety of perspectives **Assembly Rules and Restoration Ecology** contributes new knowledge and ideas to the subjects of assembly rules and restoration ecology and represents an important summary of the current status of an emerging field It combines theoretical and practical aspects of restoration making it a vital compendium of information and ideas for restoration ecologists professionals and practitioners

Land of Sweeping Plains Nicholas S. G. Williams, Adrian Marshall, John Morgan, 2015-04-22 Native temperate grasslands are Australia's most threatened ecosystems Grasslands have been eliminated from across much of their former extent and continue to be threatened by urban expansion agricultural intensification weed invasion and the uncertain impacts of climate change Research however is showing us new ways to manage grasslands and techniques for restoration are advancing The importance of ongoing stewardship also means it is vital to develop new strategies to encourage a broader cross section of society to understand and appreciate native grasslands and their ecology **Land of Sweeping Plains** synthesises the scientific literature in a readily accessible manner and includes a wealth of practical experience held by policy makers farmers community activists and on ground grassland managers It aims to provide all involved in grassland management and restoration with the technical information necessary to conserve and enhance native grasslands For readers without the responsibility of management such as students and those interested in biodiversity conservation it provides a detailed understanding of native grassland ecology management challenges and solutions and importantly inspiration to engage with this critically endangered ecosystem Practical easy to read and richly illustrated this book brings together the grassland knowledge of experts in ethnobotany ecology monitoring planning environmental psychology community engagement flora and fauna management environmental restoration agronomy landscape architecture and urban design

Restoring Ecological Health to Your Land Steven I. Apfelbaum, Alan W. Haney, 2012-02-13 **Restoring Ecological Health to Your Land** is the first practical guidebook to give restorationists and would be restorationists with little or no scientific training or background the how to information and knowledge they need to plan and implement ecological restoration activities The book sets forth a step by step process for developing implementing monitoring and refining on the ground restoration projects that is applicable to a wide range of landscapes and ecosystems The first part of the book introduces the process of ecological restoration in simple easily understood language through specific examples drawn from the authors experience

restoring their own lands in southern and central Wisconsin. It offers systematic step by step strategies along with inspiration and benchmark experiences. The book's second half shows how that same thinking and doing can be applied to North America's major ecosystems and landscapes in any condition or scale. No other ecological restoration book leads by example and first hand experience like this one. The authors encourage readers to champion restoration of ecosystems close to where they live at home on farms and ranches in parks and preserves. It provides an essential bridge for people from all walks of life and all levels of experience from land trust member property stewards to agency personnel responsible for restoring lands in their care and represents a unique and important contribution to the literature on restoration.

Restoring Natural Capital
James Aronson, Suzanne J. Milton, James N. Blignaut, 2012-09-26

How can environmental degradation be stopped? How can it be reversed? And how can the damage already done be repaired? The authors of this volume argue that a two pronged approach is needed: reducing demand for ecosystem goods and services and better management of them coupled with an increase in supply through environmental restoration. *Restoring Natural Capital* brings together economists and ecologists, theoreticians, practitioners, policy makers and scientists from the developed and developing worlds to consider the costs and benefits of repairing ecosystem goods and services in natural and socioecological systems. It examines the business and practice of restoring natural capital and seeks to establish common ground between economists and ecologists with respect to the restoration of degraded ecosystems and landscapes and the still broader task of restoring natural capital. The book focuses on developing strategies that can achieve the best outcomes in the shortest amount of time as it considers conceptual and theoretical issues from both an economic and ecological perspective, examines specific strategies to foster the restoration of natural capital and offers a synthesis and a vision of the way forward. Nineteen case studies from around the world illustrate challenges and achievements in setting targets, refining approaches to finding and implementing restoration projects and using restoration of natural capital as an economic opportunity. Throughout, contributors make the case that the restoration of natural capital requires close collaboration among scientists from across disciplines as well as local people and when successfully executed represents a practical, realistic and essential tool for achieving lasting sustainable development.

Eco-yards Laureen Rama, 2011-02-08

A gentle practical and inspiring guide to help you transform your yard into a diverse, healthy and sustainable landscape. Myrna Pearman, coauthor of *NatureScape Alberta*.
