This field guide to the trees of Southern Africa covers approximately 900 of the species found in the region. The trees are grouped into sections according to leaf shape, and each section is identified by a line drawing of the leaf group. Each species is illustrated by photographs of the diagnostic tree parts which may include flowers, fruit, bark, or a combination of these. Concise descriptions of each tree are written with an emphasis on identification, and the authors provide additional information on medicinal and other uses of the tree parts where it may be of interest to the reader. Nature-Based Solutions for Restoration of Ecosystems and Sustainable Urban Development Thomas Panagopoulos, 2020-06-16. This volume examines the applicability of nature-based solutions in ecological restoration practice and in contemporary landscape architecture by bringing together ecology and architecture in the built environment. Green infrastructure is used to address urban challenges such as climate change, adaptation, disaster risk reduction, and stormwater management. In addition, thermal comfort, nature-based solutions reintroduce critical connections between natural and urban systems. In light of ongoing developments in sustainable urban development, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. The ten contributions to this book examine a wide range of successful cases of designing healthier, greener, and more resilient landscapes in different geographical contexts, from the United States of America and Brazil through various European regions to Singapore and China. While some chapters attempt to conceptualize the interconnections between cities and nature, others clearly have an empirical focus. Therefore, this volume provides a rich body of work and acts as a starting point for further studies on restoration of ecosystems and integrative policies such as the United Nations Sustainable Development Goals. **South African Journal of Geology**, 2004. *The South and East African Year Book & Guide*, 1949.
