## **Thinking The Unthinkable Think Tanks And The Economic Counter Revolution 1931 83:**

**Three Roads to the Welfare State** Bryan Fanning, 2021-09-03 The development of social policy in Europe is explored in this accessible intellectual history and analysis of the welfare state From the Industrial Revolution onwards the book identifies three important concepts behind efforts to address social concerns in Europe social democracy Christian democracy and liberalism With guides to the political and ideological protagonists and the beliefs and values that lie behind reforms it traces the progress and legacies of each of the three traditions For academics and students across social policy and the political economy this is an illuminating new perspective on the welfare state through the last two centuries Nine Lives of Neoliberalism Philip Mirowski, Dieter Plehwe, Quinn Slobodian, 2020-05-05 Untangling the long history of neoliberalism Neoliberalism is dead Again Yet the philosophy of the free market and the strong state has an uncanny capacity to survive and even thrive in times of crisis Understanding neoliberalism s longevity and its latest permutation requires a more detailed understanding of its origins and development This volume breaks with the caricature of neoliberalism as a simple unvariegated belief in market fundamentalism and homo economicus It shows how neoliberal thinkers perceived institutions from the family to the university disagreed over issues from intellectual property rights and human behavior to social complexity and monetary order and sought to win consent for their project through the creation of new honors disciples and networks Far from a monolith neoliberal thought is fractured and occasionally even at war with itself We can begin to make sense of neoliberalism s nine lives only by understanding its own tangled and complex history **Inventing the Silent Majority in Western Europe and the United States** Anna von der Goltz, Britta Waldschmidt-Nelson, 2019-03-28 For historians of social movements this text explores 1960s and 1970s conservative political activism in the US and Western Europe *The Road from Mont Pèlerin* Philip Mirowski, Dieter Plehwe, 2015-11-16 What exactly is neoliberalism and where did it come from This volume attempts to answer these questions by exploring neoliberalism s origins and growth as a political and economic movement Now with a new preface Meanings of the Market James G. Carrier, 2020-05-28 For almost twenty years the Free Market has been a central feature of public debate in the West Eastern Europe and elsewhere In the name of the Market and its supposed benefits governments and international agencies have imposed massive changes on peoples lives Curiously scholars have paid little attention to the ways that the idea of the Market is invoked to what it might mean and how it is being used This book helps correct that state of affairs Focusing on the United States where the Market model is strongest authors analyze portrayals of the Market its values and the people within it as a way of teasing out its assumptions and contradictions They also describe extensions and practical applications of the Market model in policy making in the United States and in explaining how firms work show its political strengths and conceptual limitations In bringing rigor and sustained critical analysis to a topic of growing global significance this truly interdisciplinary study represents a coherent and incisive contribution to anthropology sociology politics history and economics as it challenges

these disciplines to come to grips with one of the most potent cultural symbols of postmodernity **Building Chicago**

**Economics** Robert Van Horn, Philip Mirowski, Thomas A. Stapleford, 2011-10-17 Over the past forty years economists associated with the University of Chicago have won more than one third of the Nobel prizes awarded in their discipline and have been major influences on American public policy Building Chicago Economics presents the first collective attempt by social science historians to chart the rise and development of the Chicago School during the decades that followed the Second World War Drawing on new research in published and archival sources contributors examine the people institutions and ideas that established the foundations for the success of Chicago economics and thereby positioned it as a powerful and controversial force in American political and intellectual life **Britain's Conservative Right since 1945** Kevin

Hickson, 2019-10-23 Winner of the Political Studies Association Conservatism Studies Group prize 2020 This book provides a detailed analysis of the evolution of the Conservative Right in Great Britain since 1945 It first explores the movement's core ideas and highlights points of tension between its different strands The book then proceeds with a thematically structured discussion The Conservative Right's views on the decline and fall of the British Empire immigration control European integration the British constitution the territorial integrity of the United Kingdom Britain's economy the welfare state and social morality and social change are all explored In the concluding chapter the author evaluates the extent to which the Conservative Right has succeeded in its core objectives since 1945 and addresses how it can best respond to a contemporary Britain in which it instinctively feels uncomfortable The book is based on extensive elite interviews and archival research and will be of interest to anyone who seeks to place the contemporary Conservative Right in a greater historical context **Left**

**and Right** Ana Rita Ferreira, João Cardoso Rosas, 2014-01-08 The great dichotomy between left and right has been a feature of pluralist politics since its emergence in modern times Left and right are also central to the understanding of the political history of the twentieth century and may be gaining renewed visibility in the context of the current economic crisis both in Europe and beyond Should scholars think once again with and within the dichotomy or can they think better beyond its strictures The contributions to this volume provide answers to these and other questions in ways that are theoretically sound and empirically informed **Making Things Happen** Gerald Frost, 2015-03-17 Before he was forty Nigel Vinson inventor entrepreneur philanthropist and farmer had achieved what many struggle to achieve in a lifetime He had created and built up a successful company based on his own ideas floated it on the stock exchange and made more than enough money to never have to work again But instead of retiring Vinson forged a unique career in British public life as he sought to find answers to the daunting political and economic problems confronting Britain This was partly achieved through the wider application of ideas he had developed when running his own business but also by helping funding and cooperating with others he judged capable of making a contribution to the country's recovery We have it on the authority of Margaret Thatcher herself that Thatcherism would never have happened without the Centre for Policy Studies the think tank Vinson

helped her establish This biography tells the story of a man whose influence both direct and indirect has been considerably greater than is widely realised He is a man who saw through the fashionable shibboleths of his day but was often ahead of the trend a man whose do as you would be done by moral philosophy enormously practical nature and infectious enthusiasm have been fundamental to his continued success Nigel Vinson is a man who has made things happen and he continues to do so to this day
