Thought And Emotion Developmental Perspectives Jean Piaget Symposium:

Thought and Emotion D. J. Bearison, H. Zimiles, 2014-01-14 First published in 1985 The purpose of this book reflects the 1983 Piaget Society decision to contribute some ideas to a critical problem in psychology how the structure and function of intelligence and affectivity are developmentally related Although this is a fundamental question in psychology it has largely been ignored at different periods in its history With the maturing of the cognitive sciences in the past quarter of a century there today is a recrudescence of interest in the ways in which affect influences cognition Developmental Perspectives on Embodiment and Consciousness Willis Overton, Ulrich Mueller, Judith Newman, 2007-09-19 Until recently the body has been largely ignored in theories and empirical research in psychology particularly in developmental psychology Recently however several conceptions of the relation between body and mind have been developed Common among these conceptions is the idea that the body plays an important role in our emotional social and *Cultural and Contextual Perspectives on Developmental Risk and Well-Being* Jacob A. Burack, Louis A. Schmidt, 2014-05-26 Developmental risk refers to conditions characteristics experiences or situations with potentially deleterious effects that lead to outcomes later in life that do not meet societal expectations While risk is typically framed as the statistical probability of a problematic outcome in relation to the general population the converse notion of well being is considered in relation to the level of functioning at a given developmental stage The contributors to this volume provide insight into developmental well being by examining the ways that culture and context affect outcomes associated with various types of risk such as those related to oppression academic performance family background life history physical health and psychiatric conditions Even though certain outcomes may seem inevitable in cases involving harmful environments diseases and disorders they are virtually all influenced by complex interactions among individuals their families communities and societies

Thought and Emotion D. J. Bearison, H. Zimiles, 2014-01-14 First published in 1985 The purpose of this book reflects the 1983 Piaget Society decision to contribute some ideas to a critical problem in psychology how the structure and function of intelligence and affectivity are developmentally related Although this is a fundamental question in psychology it has largely been ignored at different periods in its history With the maturing of the cognitive sciences in the past quarter of a century there today is a recrudescence of interest in the ways in which affect influences cognition The Epigenesis of Mind Susan Carey, Rochel Gelman, 2014-01-14 Reflecting the focus of a Jean Piaget Symposium entitled Biology and Knowledge Structural Constraints on Development this volume presents many of the emergent themes discussed Among these themes are Structural constraints on cognitive development and learning come in many shapes and forms and involve appeal to more than one level of analysis To postulate innate knowledge is not to deny that humans can acquire new concepts It is unlikely that there is only one learning mechanism even if one prefers to work with general as opposed to domain specific mechanisms The problems of induction with respect to concept acquisition are even harder than originally thought Reasoning, Necessity,

and Logic Willis F. Overton, 2013-05-13 A presentation of current work that systematically explores and articulates the nature origin and development of reasoning this volume's primary aim is to describe and examine contemporary theory and research findings on the topic of deductive reasoning Many contributors believe concepts such as structure competence and mental logic are necessary features for a complete understanding of reasoning As the book emanates from a Jean Piaget Symposium his theory of intellectual development as the standard contemporary treatment of deductive reasoning is used as the context in which the contributors elaborate on their own perceptions **Art and Human Development** Constance

Milbrath, Cynthia Lightfoot, 2013-05-13 This interdisciplinary volume explores art its development and its role in the construction of knowledge Presenting theory and research on artistic development as a cultural and creative endeavor contributors examine the origins of human art during the Paleolithic cultural revolution as part of a modern cultural transformation in the growth of a creative artist and in developing children Target chapters expressing the disciplinary perspectives of psychology archaeology communications education and the performing arts are followed by commentaries from internationally acclaimed scholars of human development Part 1 explores how cultures harness and exploit the arts to give expression to values social practices and traditions This section traces the emergence of new art forms that arose during social unrest including the symbolization of spiritual beliefs expressed on the walls of Paleolithic caves and the racial identity and cultural values expressed in the media of the hip hop generation Part 2 examines the journeys of a composer and a group of students to highlight the process of becoming an artist and the role education plays in its development The book concludes with a focus on the development of aesthetic appreciation and artistic activity in childhood and adolescence including for example how a child's developing theory of mind affects appreciation for the arts and how developing empathy and emotional regulation contribute to the cognitive and affective underpinnings of acting in adolescence As a whole contributors explore the developmental sociocultural and evolutionary processes that make the creation and experience of art possible Intended for researchers and advanced students in both human development and the arts this book will also serve as a textbook for advanced courses on psychology and the arts and or special topics courses in cognitive and or human development

Language, Literacy, and Cognitive Development Eric Amsel, James P. Byrnes, 2002-12-01 Language Literacy and Cognitive Development addresses the impact of language and literacy on cognitive development Top researchers examine the cognitive significance of the growth in children's ability to express themselves symbolically whether that involves communicating linguistically mathematically logically or through some other symbol system expressed in speech gesture notations or some other means The book contributes to refining and answering questions regarding the nature origin and development of symbolic communication in all its forms and their consequences for the cognitive development of the younger child at home and the older child at school **Piaget's Theory** Harry Beilin, Peter B. Pufall, 2013-04-15 This volume marks the 20th Anniversary Symposium of the Jean Piaget Society Some of the American contributors were among the first to introduce

Piaget to developmental and educational psychology in the United States while some of the international contributors worked with Piaget to develop his program of genetic epistemology and continue to make significant contributions to it Within this volume the possibility of Piaget s paradigm is reviewed not only as the stuff of normal science yielding fascinating empirical questions that linger within it but also and more importantly as the stuff of revolutionary science with continuing potential to comprehensively structure our thinking about developmental theory The constructive contribution Piaget s theory has for developmental theory emerges as four central themes in the volume understanding the intentional or semantic aspect of mental life without abandoning the Piagetian assumption that is rational and committed to truth testing examining mental life and its development as a dialectical relation of function and structure a relation Piaget introduced in his study of the developmental relation between procedural and operational knowledge exploring new and interdisciplinary perspectives on equilibration as the driving force of constructive adaptive processes understanding social and historical forces in individual and cultural development not necessarily as forces antithetical to Piaget s perspective but as forces that take on new meaning within his framework which avoids erroneous dichotomies such as the distinction between subjective and objective knowledge

Conceptual Development Ellin Kofsky Scholnick, Katherine Nelson, Susan A. Gelman, Patricia H.

Miller, 1999-04-01 This book examines a key issue in current cognitive theories the nature of representation Each chapter is characterized by attempts to frame hot topics in cognitive development within the landscape of current developmental theorizing and the past legacy of genetic epistemology The chapters address four questions that are fundamental to any developmental line of inquiry How should we represent the workings and contents of the mind How does the child construct mental models during the course of development What are the origins of these models and What accounts for the novelties that are the products and producers of developmental change These questions are situated in a historical context Piagetian theory and contemporary researchers attempt to trace how they draw upon depart from and transform the Piagetian legacy to revisit classic issues such as the child s awareness of the workings of mental life the child s ability to represent the world and the child s growing ability to process and learn from experience The theoretical perspectives covered include constructivism connectionism theory theory information processing dynamical systems and social constructivist approaches The research areas span imitation mathematical reasoning biological knowledge language development and theory of mind Written by major contributors to the field this work will be of interest to students and researchers wanting a brief but in depth overview of the contemporary field of cognitive development
