The Future of Indian and Federal Reserved Water Rights Barbara Cosens, Judith V. Royster, 2012-06-16 On January 6 1908 the Supreme Court ruled that when land is set aside for the use of Indian tribes that reservation of land includes reserved water rights The Winters Doctrine as it has come to be known is now a fundamental principle of both federal Indian law and water law and has expanded beyond Indian reservations to include all federal reservations of land Ordinarily there would not be much to say about a one hundred year old Supreme Court case But while its central conclusion that a claim to water was reserved when the land was reserved for Indians represents a commitment to justice the exact nature of that commitment its legal basis scope implications for non Indian water rights holders the purposes for and quantities of water reserved the geographic nexus between the land and the water reserved and many other details of practical consequence has been and continues to be litigated and negotiated In this detailed collection of essays lawyers historians and tribal leaders explore the nuances of these issues and legacies
