Transcendence and Non-Naturalism in Early Chinese

Thought Alexis McLeod, Joshua R. Brown, 2020-09-03 Contemporary scholars of Chinese philosophy often presuppose that early China possessed a naturalistic worldview devoid of any non natural concepts such as transcendence Challenging this presupposition head on Joshua R Brown and Alexis McLeod argue that non naturalism and transcendence have a robust and significant place in early Chinese thought This book reveals that non naturalist positions can be found in early Chinese texts in topics including conceptions of the divine cosmogony and apophatic philosophy Moreover by closely examining a range of early Chinese texts and providing comparative readings of a number of Western texts and thinkers the book offers a way of reading early Chinese Philosophy as consistent with the religious philosophy of the East and West including the Abrahamic and the Brahmanistic religions Co written by a philosopher and theologian this book draws out unique insights into early Chinese thought highlighting in particular new ways to consider a range of Chinese concepts including tian dao li and you wu

Dao Companion to the Philosophy of Xunzi Eric L. Hutton, 2016-11-09 This volume presents a comprehensive analysis of the Confucian thinker Xunzi and his work which shares the same name It features a variety of disciplinary perspectives and offers divergent interpretations The disagreements reveal that as with any other classic the Xunzi provides fertile ground for readers It is a source from which they have drawn and will continue to draw different lessons In more than 15 essays the contributors examine Xunzi's views on topics such as human nature ritual music ethics and politics They also look at his relations with other thinkers in early China and consider his influence in East Asian intellectual history A number of important Chinese scholars in the Song dynasty 960 1279 CE sought to censor the Xunzi They thought that it offered a heretical and impure version of Confucianism As a result they directed study away from the Xunzi This has diminished the popularity of the work However the essays presented here help to change this situation They open the text's riches to Western students and scholars The book also highlights the substantial impact the Xunzi has had on thinkers throughout history even on those who were critical of it Overall readers will gain new insights and a deeper understanding of this important but often neglected thinker

Aquinas and the Early Chinese Masters Joshua Brown, Joshua R. Brown, 2024 *Aquinas and the Early Chinese Masters* lays intellectual foundations for the integration of Chinese philosophy into Catholic theology Although Catholic theology in Chinese contexts has drawn upon Chinese philosophical concepts few have attempted to develop a rigorous systematic approach to testing what in the Chinese philosophical traditions can be fruitful or unfruitful for Catholic theological expression This book attempts to model such an approach by engaging classical Chinese philosophy with the mind and spirit of St Thomas Aquinas who read Aristotle and other pagan philosophers with both charitable appreciation and a firm critical eye It applies this Thomistic lens through concrete comparative engagements with three main

representatives of early Chinese philosophy Mencius Mengzi Xunzi and Mozi In each chapter the book presents Aquinas thought as an evaluative frame for perceiving how Chinese philosophical commitments and concepts do or do not seem fit for adoption into Catholic theological science Following the general structure of the Summa theologiae the book is comprised of six chapters touching on the doctrine of God morality and Christology The first two chapters engage Confucian master Mengzi s notion of Heaven Tian and then the Mohist doctrine of Heaven s Will Tian zhi Chapter three provides a Thomistic assessment of the two main positions in the classical Confucian debate on the goodness of man s moral nature renxing Chapter four compares Aquinas account of charity and Mozi s doctrine of universal love jian ai Chapter 5 offers a Thomistic assessment of the possibility of understanding Christ in terms of Xunzi s sage shengren Finally Chapter 6 explores Christ as a moral teacher by putting Aquinas reading of Matt 8 21 22 into conversation with Confucian ethics of filial virtue

The ^AEmotions in Early Chinese Philosophy Curie Virág, 2017-02-13 In China the debate over the moral status of emotions began around the fourth century BCE when early philosophers first began to invoke psychological categories such as the mind xin human nature xing and emotions qing to explain the sources of ethical authority and the foundations of knowledge about the world Although some thinkers during this period proposed that human emotions and desires were temporary physiological disturbances in the mind caused by the impact of things in the world this was not the account that would eventually gain currency The consensus among those thinkers who would come to be recognized as the foundational figures of the Confucian and Daoist philosophical traditions was that the emotions represented the underlying dispositional constitution of a person and that they embodied the patterned workings of the cosmos itself Curie Vir g sets out to explain why the emotions were such a central preoccupation among early thinkers situating the entire debate within developments in conceptions of the self the cosmos and the political order She shows that the mainstream account of emotions as patterned reality emerged as part of a major conceptual shift towards the recognition of natural reality as intelligible orderly and coherent The mainstream account of emotions helped to summon the very idea of the human being as a universal category and to establish the cognitive and practical agency of human beings This book the first intensive study of the subject traces the genealogy of these early Chinese philosophical conceptions and examines their crucial role in the formation of ethical political and cultural values in China
