Anderson, Judy Anderson,2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug in automobiles It describes the politics technology marketing strategies and environmental issues that have impacted electric and hybrid cars research and development The important marketing shift from a woman's car to going green is discussed Milestone projects and technologies such as early batteries hydrogen and bio mass fuel cells the upsurge of hybrid vehicles and the various regulations and market forces that have shaped the industry are also covered [Statistical Programming with SAS/IML Software](#) Rick Wicklin,2010-10-01 Annotation SAS IML software is a powerful tool for data analysts because it enables implementation of statistical algorithms that are not available in any SAS procedure Rick Wicklin's *Statistical Programming with SAS IML Software* is the first book to provide a comprehensive description of the software and how to use it He presents tips and techniques that enable you to use the IML procedure and the SAS IML Studio application efficiently In addition to providing a comprehensive introduction to the software the book also shows how to create and modify statistical graphs call SAS procedures and R functions from a SAS IML program and implement such modern statistical techniques as simulations and bootstrap methods in the SAS IML language Written for data analysts working in all industries graduate students and consultants *Statistical Programming with SAS IML Software* includes numerous code snippets and more than 100 graphs **Assessment of Fuel Economy Technologies for Light-Duty Vehicles** National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on the Assessment of Technologies for Improving Light-Duty Vehicle Fuel Economy,2011-07-03 Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars sport utility vehicles minivans and other light duty vehicles without compromising vehicle performance or

safety Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines spark ignition gasoline compression ignition diesel and hybrid According to its estimates adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark ignition engines could reduce fuel consumption by 29 percent at an additional cost of 2 200 to the consumer Replacing spark ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately 5 900 per vehicle and replacing spark ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of 6 000 per vehicle The book focuses on fuel consumption the amount of fuel consumed in a given driving distance because energy savings are directly related to the amount of fuel used In contrast fuel economy measures how far a vehicle will travel with a gallon of fuel Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information **Green**
