TRAFFIC and Transport Psychology Raphael D. Huguenin, Talib Rothengatter, 2004

Traffic and Transport Psychology Geoffrey Underwood, 2005-06-09 Just as our transport systems become more and more important to our economic and social well being so they become more and more crowded and more at risk from congestion disruption and collapse Technology and engineering can provide part of the solution but the complete solution will need to take account of the behaviour of the users of the transport networks The role of psychologists in this is to understand how people make decisions about the alternative modes of transport and about the alternative routes to their destinations to understand how novice and other vulnerable users can develop safe and effective behaviours how competent users can operate within the transport system optimally and within their perceptual and cognitive limitations The contributions to this volume address these issues of how the use of our transport systems can be improved by taking into account knowledge of the behaviour of the people who use the systems Topics discussed include driver training and licensing driver impairment road user attitudes and behaviour enforcement and behaviour change driver support systems and the psychology of mobility and transport mode choice This work will be of value not only to psychologists but to all transport professionals interested in the application of psychology to traffic

The Psychology of Driving on Rural Roads Gert

Weller,2010-07-07 Rural roads constitute the most dangerous road category with regard to the number of fatal accidents In order to increase traffic safety on rural roads it is necessary to take into account not only their inherent properties but also their effect on behaviour Gert Weller develops a psychological model for driving on rural roads which is validated in three empirical steps laboratory simulator and driving experiments His results provide insight into the possibilities of how driving behaviour on rural roads can be influenced and give practical guidance for the enhancement of rural road safety The book is written for psychologists in the fields of traffic psychology and human factors research traffic engineers road planners as well as for political decision makers in traffic planning departments **Behavioural Adaptation and Road Safety** Christina

Rudin-Brown,Samantha Jamson,2013-05-24 Despite being an accepted construct in traffic and transport psychology the precise nature of behavioural adaptation including its causes and consequences has not yet been established within the road safety community A comprehensive collection of recent literature Behavioural Adaptation and Road Safety Theory Evidence and Action explores behavioural adaptation in road users It examines behavioural adaptation within the context of historical and theoretical perspectives and puts forth tangible and practical solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs Edited by Christina Rudin Brown and Samantha Jamson with chapters authored by leading road safety experts in driver psychology and behaviour the book introduces the concept of behavioural adaptation and details its more relevant issues It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces identifying where it may be lacking and how it might be improved This sets the context for the remaining chapters which take the OECD definition as their starting points The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed during the last half century It provides examples of the evidence for behavioural adaptation instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures The book then focuses on the internal human element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups The book concludes with practical tools and methodologies to address behavioural adaptation in research and design and to limit the potential negative effects before they happen Supplying easy to understand accessible solutions that can be implemented early on in a road safety intervention s design or conception phase the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice methods and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs It is an essential component of any road safety library and should be of particular relevance to researchers practitioners designers and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport related design

Transport and Climate Change Tim Ryley, Lee Chapman, 2012-07-17 This topical volume covers the intersection between transport and climate change with papers from the Transport Climate Change session of the RGS IBG conference in London September 2010 It considers the role of transport modes at varying spatial dimensions and a range of perspectives on the relationship between transport and climate change

The Handbook of Human-Machine Interaction Guy A. Boy, 2017-11-01 The Handbook of Human Machine Interaction features 20 original chapters and a conclusion focusing on human machine interaction HMI from analysis design and evaluation perspectives It offers a comprehensive range of principles methods techniques and tools to provide the reader with a clear knowledge of the current academic and industry practice and debate that define the field The text considers physical cognitive social and emotional aspects and is illustrated by key application domains such as aerospace automotive medicine and defence Above all this volume is designed as a research guide that will both inform readers on the basics of human machine interaction from academic and industrial perspectives and also provide a view ahead at the means through which human centered designers including engineers and human factors specialists will attempt to design and develop human machine systems

Driver Acceptance of New Technology Tim Horberry, Michael A. Regan, Alan Stevens, 2018-09-03 Acceptance of new technology and systems by drivers is an important area of concern to governments automotive manufacturers and equipment suppliers especially technology that has significant potential to enhance safety To be acceptable new technology must be useful and satisfying to use If not drivers will not want to have it in which case it will never achieve the intended safety benefit Even if they have the technology drivers may not use it if it is deemed unacceptable or may not use it in the manner intended by the designer At worst they may seek to disable it This book brings into a single edited volume the accumulating body of thinking and research on driver and operator acceptance of new technology Bringing together contributions from international experts from around the world the editors have shaped a book that covers the theory behind acceptance how it can be measured and how it can be improved Case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology Although driver acceptance is the central focus of this book acceptance of new technology by operators in other domains and across cultures is also investigated Similarly perspectives are derived from domains such as human computer interaction where user acceptance has long been regarded as a key driver of product success This book comes at a critical time in the history of the modern motor vehicle as the number of new technologies entering the modern vehicle cockpit rapidly escalates The goal of this book is to inspire further research and development of new vehicle technology to optimise user acceptance of it and in doing so to maximise its potential to be useful satisfying to use and able to save human life

percent of the world's drivers 60 million in all will be over the age of 65. Consequently, safe and efficient mobility for older adults is a complex and pressing issue. Maintaining Safe Mobility in an Aging Society addresses the complexities surrounding the booming number of aging drivers and practical solutions for sustaining safe travel.

Cultural Differences in Human-Computer Interaction Rüdiger Heimgärtner, 2012-11-21. Es wird eine Methode zur Bestimmung von quantitativ klassifizierenden kulturellen Variablen der Mensch-Maschine-Interaktion MMI präsentiert und in einem Werkzeug für die interkulturelle Interaktionsanalyse umgesetzt. Rüdiger Heimgärtner zeigt, dass MMI anhand der kulturell geprägten Interaktionsmuster des Benutzers automatisch an dessen kulturellen Hintergrund angepasst werden kann. Empfehlungen für das Design interkultureller Benutzungsschnittstellen sowie für die Architekturbildung kulturell adaptiver Systeme runden die Arbeit ab. Driver Behaviour and Training Dr. Lisa Dorn, 2012-10-28. Research on driver behaviour has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The objective of the book and of the conference on which it is based is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines. The book is timely in its aim of defining new approaches to driver training methodology based on decades of empirical research on driver behaviour. The contributing road safety researchers and professionals consider the kinds of methods that are effective in teaching drivers the higher level skills needed to be a safe, competent driver. The readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field from regulatory authorities and professional driver training organisations such as the police service and private and public sector personnel who are concerned with improving road safety.

Driver Behaviour and Training: Volume 2 Dr. Lisa Dorn, 2017-07-05. Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020, currently more than 20 million deaths and injuries per year. The objective of this second edition and of the conference on which it is based is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between

practitioners in road safety and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines A major focus is to consider how driver training needs to be adapted to take into account driver characteristics goals and motivations in order to raise awareness of how these may contribute to unsafe driving behaviour and to go on to promote the development of driver training courses that considers all the skills that are essential for road safety As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills based approach Readership includes road safety researchers from a variety of different academic backgrounds senior practitioners in the field of driver training from regulatory authorities and professional driver training organizations such as the police service and private and public sector personnel who are concerned with improving road safety
