Rebound Cindy Kuzma, Carrie Jackson Cheadle, 2019-08-22 The evidence backed guidance in this long overdue resource is as crucial to managing the mental side of injury as good healthcare providers are to managing the physical side. Matt Fitzgerald, author of *80/20 Running*. Written by a leading mental skills coach and contributing editor to *Runner's World US*, this is a practical guide to building the psychological resilience that athletes need to recover from injury and rebound stronger. Injuries affect every athlete from the elite Olympian to the weekend racer. In the moment, a traumatic crash, a torn muscle, or a stress fracture can feel like the most devastating event possible. While some athletes are destroyed by the experience, others emerge from their recovery better, stronger, and more confident than ever. The key to a swifter, stronger comeback is the use of mental skills, psychological tools that enable an athlete to take control of their recovery and ultimately use the experience to their advantage. Injury and other setbacks are inevitable, but with training, overcoming them skillfully and confidently is possible. This book will provide a clear, compelling explanation of psychological recovery from injury and a practical guide to building mental resilience. Weaving together personal narratives from star athletes, scientific research, and the specialized clinical expertise of mental skills coach Carrie Jackson Cheadle, it will contain more than 45 Mental Skills and Drills that athletes can use at every phase of their recovery process. These same strategies can help athletes who aren't currently injured reduce their vulnerability to injury and enable any individual to reach new heights within their sport and beyond.

Previously published **Theories of Affect and Concepts in Generic Skills Education** Wera Grahn, Edyta Just, 2017-08-21. During the last few years the concept of generic skills and competences has become widespread across universities. An introduction to generic competences is as such important because it enables redefinition of educational goals and may positively rearrange forms of interaction in classes. It also indicates that education should inspire students to develop and use critical and creative forms of thinking, feeling, and doing. On the one hand, the need to promote generic skills can be seen as driven by neoliberal desire. On the other, however, generic competences can enable students to think, feel, and act differently, but also respect and welcome various forms of life and ways of living. Responding to the growing need to reflect upon generic competences, this book contributes to the various ways of conceptualising generic skills and the methods in which they might be acquired. The volume engenders adventurous encounters between different theories which predominantly come from the feminist conceptual framework that result in appealing meanings of affect and concepts. It also experimentally explores and discusses ways in which theories of affect and concepts may complicate understanding of generic competences and inspire generic skills-oriented education. Consequently, this collection revitalizes the concept of generic skills but also advocates daring pedagogical practices that invigorate the meaning of and approach to teaching and learning in present landscapes of higher education. **Indebted to Moreno** Kate Walker, 2016-10-01. Designing his precious sister's wedding gown will cement Rose's career. But if she'd known that accepting Nairo's offer would see her blackmailed into becoming a more than convenient fiancée to the man who broke her heart, Rose would have said no. Wouldn't she? *The Divine Private Detective Agency Collection* Lynne Hinton, 2016-11-22. Sister Eve Private Eye. Sister Eve knows God moves in mysterious ways. And Eve adores a good mystery.
