Teaching and Learning at a Distance

Michael Simonson,Sharon Smaldino,Susan M. Zvacek,2014-10-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices

presented in Teaching and Learning at a Distance are validated by scientific evidence. Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research. The third theme of Teaching and Learning at a distance is derived from Richard Clark's famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement. Clark's controversial work is discussed in the book but is also fundamental to the book's advocacy for distance education. In other words, we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn. Distance delivered instruction is not a magical approach that makes learners achieve more. The fourth theme of the book is equivalency theory. Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom. The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive; that it should cover as much of the various ways instruction is made available to distant learners as is possible. It should be a single source of information about the field.

New Technology in Education and Training Jon-Chao Hong, 2025-07-22. This book presents selected papers from the 6th International Conference on Advances in Education and Information Technology AEIT 2025 held in Fukuoka, Japan, from January 10-12, 2025. With a worldwide increase in the development of new technology such as artificial intelligence (AI) and extended reality to enhance learning in school and industry settings, there is a progressive need to study the implementation of new technology in education and training. Of global concern in this area include issues such as teaching approaches, classroom management, and the evaluation of learning effectiveness. This book examines these topics and serves as a useful resource for beginner educators, academics, entrepreneurs, and professionals who are working in the field of implementing new technology in education and training.

State, Foreign Operations, and Related Programs Appropriations for 2017 United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2016. The Emerging Technology of Big Data Heru Susanto, Fang-Yie Leu, Chin Kang Chen, 2019-03-29. Big Data is now highly regarded and accepted as a useful tool to help organizations manage their data and information effectively and efficiently. This new volume, *The Emerging Technology of Big Data: Its Impact as a Tool for ICT Development*, looks at the new technology that has emerged to meet the growing need and demand and studies the impact of Big Data in several areas of today's society, including social media, business process re-engineering, science, e-learning, higher education, business intelligence, and green computing. In today's modern society, information systems (IS) through Big Data contribute to the success of organizations because it provides a solid foundation for increasing both efficiency and productivity. Many business organizations and educational institutions realize that compliance with Big Data will affect their prospects for success. Everyday the amount of data collected from digital tools grows tremendously. As the

amount of data increases the use of IS becomes more and more essential The book looks at how large datasets and analytics have slowly crept into the world of education and discusses methods of teaching and learning and the collection of student learning data The final chapter of the book considers the environmental impacts of ICT and emphasizes green ICT awareness as a corporate strategy through information systems The global ICT industry accounts for approximately 2 percent of global carbon dioxide CO2 emissions and the manufacture shipping and disposal of ICT equipment also contributes environmentally This chapter addresses these issues The information provided here will be valuable information for education professionals businesses faculty scientists and researchers and others Instructional Design Essentials Sean Cordes,2018-05-22
