British Musical Modernism Philip Ernst Rupprecht, 2015-07-09 The first in depth historical analysis of British art music post 1945 providing a group portrait of eleven composers ranging from avant garde to pop Luigi Dallapiccola and

Musical Modernism in Fascist Italy Ben Earle, 2013-08-15 Luigi Dallapiccola is widely considered a defining figure in twentieth century Italian musical modernism whose compositions bear passionate witness to the historical period through which he lived In this book Ben Earle focuses on three major works by the composer the one act operas *Volo di notte* Night Flight and *Il prigioniero* The Prisoner and the choral *Canti di prigionia* Songs of Imprisonment setting them in the context of contemporary politics to trace their complex path from fascism to resistance Earle also considers the wider relationship between musical modernism and Italian fascism exploring the origins of musical modernism and investigating its place in the institutional structures created by Mussolini's regime In doing so he sheds new light on Dallapiccola's work and on the cultural politics of the early twentieth century to provide a history of musical modernism in Italy from the fin de siècle to the early Cold War **Musical Modernism in Global Perspective** Björn Heile, 2024-05-30 The first study of the global

dimensions of musical modernism and its transnational diasporic network of composers musicians and institutions Music and the Making of Modern Japan Margaret Mehl, 2024-05-29 Japan was the first non Western nation to compete with the Western powers at their own game The country's rise to a major player on the stage of Western music has been equally spectacular The connection between these two developments however has never been explored How did making music make Japan modern How did Japan make music that originated in Europe its own And what happened to Japan's traditional music in the process Music and the Making of Modern Japan answers these questions Discussing musical modernization in the context of globalization and nation building Margaret Mehl argues that far from being a side show music was part of the action on centre stage Making music became an important vehicle for empowering the people of Japan to join in the shaping of the modern world In only fifty years from the 1870s to the early 1920s Japanese people laid the foundations for the country's post war rise as a musical as well as an economic power Meanwhile new types of popular song fuelled by the growing global record industry successfully blended inspiration from the West with musical characteristics perceived as Japanese Music and the Making of Modern Japan represents a fresh contribution to historical research on making music as a major cultural social and political force *The SAGE International Encyclopedia of Music and Culture* Janet Sturman, 2019-02-26 The SAGE Encyclopedia of Music and Culture presents key concepts in the study of music in its cultural context and provides an introduction to the discipline of ethnomusicology its methods concerns and its contributions to knowledge and understanding of the world's musical cultures styles and practices The diverse voices of contributors to this encyclopedia

Handbook of Japanese Music in the Modern Era Henry Johnson, 2023-11-20 Exploring an array of captivating topics from hybridized Buddhist music to AI singers, this book introduces Japanese music in the modern era. The twenty-five chapters show how cultural change from the late nineteenth century to the present day has had a profound impact on the Japanese musical landscape, including the recontextualization and transformation of traditional genres and the widespread adoption of Western musical practices ranging from classical music to hip hop. The contributors offer representative case studies within the themes of Foundations, Heritage, Institutions, and Hybridities, examining both musical styles that originated in earlier times and distinctly localized or Japanized musical forms.

Decentering Musical Modernity Tobias Janz, Chien-Chang Yang, 2019-06-13 This collection investigates the concept of modernity in music and its multiple interpretations in Europe and East Asia. Through contributions by both European and East Asian musicologists, it discusses how a decentered understanding of musical modernity could be matched on multiple historiographical perspectives while being attentive to the specificities of local music and their narratives in East Asia and Europe. The essays connect local, global, and transnational history with sociological theories of modernity and modernization, making the volume an important contribution to overcoming the Eurocentric dichotomy between Western music and world music within the field of historical musicology.

A History of Emotion in Western Music Michael Spitzer, 2020-09-14 When asked to describe what music means to them, most people talk about its power to express or elicit emotions. As a melody can produce a tear, tingle the spine, or energize athletes, music has a deep impact on how we experience and encounter the world. Because of the elusiveness of these musical emotions, however, little has been written about how music creates emotions and how musical emotion has changed its meaning for listeners across the last millennium. In this sweeping landmark study, author Michael Spitzer provides the first history of musical emotion in the Western world, from Gregorian chant to Beyoncé. Combining intellectual history, music studies, philosophy, and cognitive psychology, *A History of Emotion in Western Music* introduces current approaches to the study of emotion and formulates an original theory of how musical emotion works. Diverging from psychological approaches that center listeners' self-reports or artificial experiments, Spitzer argues that musical emotions can be uncovered in the techniques and materials of composers and performers.

Together with its extensive chronicle of the historical evolution of musical style and emotion this book offers a rich union of theory and history **New Music and the Crises of Materiality** Samuel Wilson, 2021-07-04 This book explores the transformation of ideas of the material in late twentieth and early twenty first century musical composition New music of this era is argued to reflect a historical moment when the idea of materiality itself is in flux Engaging with thinkers such as Theodor Adorno Sara Ahmed Zygmunt Bauman Rosi Braidotti and Timothy Morton the author considers music's relationship with changing material conditions from the rise of neo liberalism and information technologies to new concepts of the natural world Drawing on musicology cultural theory and philosophy the author develops a critical understanding of musical bodies objects and the environments of their interaction Music is grasped as something that both registers material changes in society whilst also enabling us to practice materiality differently
