*Translating Worlds* William F. Hanks, 2015      **Translating Worlds** Carlo Severi, William F. Hanks, 2015-12-15 Set against the backdrop of anthropology's recent focus on various turns whether ontological, ethical, or otherwise, this pathbreaking volume returns to the question of knowledge and the role of translation as a theoretical and ethnographic guide for twenty-first century anthropology, gathering together contributions from leading thinkers in the field. Since Ferdinand de Saussure and Franz Boas, languages have been seen as systems whose differences make precise translation nearly impossible. And still others have viewed translation between languages as principally indeterminate. The contributors here argue that the challenge posed by the constant confrontation between incommensurable worlds and systems may be the most fertile ground for state-of-the-art ethnographic theory and practice. Ranging from tourism in New Guinea to shamanism in the Amazon to the globally ubiquitous restaurant menu, the contributors mix philosophy and ethnography to redefine translation not only as a key technique for understanding ethnography but as a larger principle in epistemology.      Translating Worlds, Defending Land Casey High, 2025-02-18 In 2019, after decades of ecological damage from oil, Waorani people took to the streets of Amazonian Ecuador to protest drilling on their ancestral lands. Working with international activists, lawyers, and other Indigenous groups, they successfully sued the government for selling oil concessions without prior consent. Placing their struggle for territorial autonomy in the global spotlight, this unprecedented legal victory for environmental rights by an Indigenous people reflected the new forms of collaboration emerging in contemporary Amazonia. *Translating Worlds, Defending Land* explores how Waorani collaborations, whether with environmentalists or academic researchers, bring about new possibilities, challenges, and imaginative horizons. Based on fieldwork over a period of twenty-five years, Casey High interrogates what these engagements mean for Indigenous communities and how they offer critical reflection on collaboration as a concept, method, and practice. The alliances, misunderstandings, and conflicts that emerge in these contexts challenge the assumption that productive collaborations reflect or require shared purposes, generating important implications for an engaged anthropology open to reconsidering what constitutes ethnographic knowledge and who it is for. As some young Waorani adults become not just community leaders or environmental citizens but also skilled researchers and ethnographers translating between Indigenous understandings of land and the Western language of conservation, they create a powerful new voice in international environmental politics.      *The Routledge Handbook of Translation and Religion* Hephzibah Israel, 2022-12-19 *The Routledge Handbook of Translation and Religion* is the first to bring together an extensive interdisciplinary engagement with the multiple ways in which the concepts and practices of translation and religion intersect. The book engages a number of scholarly disciplines in conversation with each other, including the study of translation and interpreting, religion, philosophy, anthropology, history, art history, and area studies. A range of leading and emerging international specialists critically engage with changing understandings of the key categories translation and religion as

discursive constructs thus contributing to the development of a new field of academic study translation and religion The 28 contributions divided into six parts analyze how translation constructs ideas texts or objects as sacred or for religious purposes often in competition with what is categorized as non religious The part played by faith communities is treated as integral to analyses of the role of translation and religion It investigates how or why translation functions in re constructing and transforming religion s and for whom and examines a range of sacred texts in translation from the written to the spoken manuscript to print paper to digital architectural form to objects of sacred art intersemiotic scriptural texts and where commentary exegesis and translation interweave This Handbook is an indispensable scholarly resource for researchers in translation studies and the study of religions

**The Routledge Handbook of Translation and Culture** Sue-Ann Harding,Ovidi Carbonell Cortés,2018-04-09 The Routledge Handbook of Translation and Culture collects into a single volume thirty two state of the art chapters written by international specialists overviewing the ways in which translation studies has both informed and been informed by interdisciplinary approaches to culture The book s five sections provide a wealth of resources covering both core issues and topics in the first part The second part considers the relationship between translation and cultural narratives drawing on both historical and religious case studies The third part covers translation and social contexts including the issues of cultural resistance indigenous cultures and cultural representation The fourth part addresses translation and cultural creativity citing both popular fiction and graphic novels as examples The final part covers translation and culture in professional settings including cultures of science legal settings and intercultural businesses This handbook offers a wealth of information for advanced undergraduates postgraduates and researchers working in translation and interpreting studies

**More Than Words** Richard Fox,2018-09-15 Grounded in ethnographic and archival research on the Indonesian island of Bali More Than Words challenges conventional understandings of textuality and writing as they pertain to the religious traditions of Southeast Asia Through a nuanced study of Balinese script as employed in rites of healing sorcery and self defense Richard Fox explores the aims and desires

embodied in the production and use of palm leaf manuscripts amulets and other inscribed objects Balinese often attribute both life and independent volition to manuscripts and copperplate inscriptions presenting them with elaborate offerings Commonly addressed with personal honorifics these script bearing objects may become partners with humans and other sentient beings in relations of exchange and mutual obligation The question is how such practices of the living letter may be related to more recently emergent conceptions of writing linked to academic philology reform Hinduism and local politics which take Balinese letters to be a symbol of cultural heritage and a neutral medium for the transmission of textual meaning More than Words shows how Balinese practices of apotropaic writing on palm leaves amulets and bodies challenge these notions and yet coexist alongside them Reflecting on this coexistence Fox develops a theoretical approach to writing centered on the premise that such contradictory sensibilities hold wider significance than previously recognized for the history and practice of religion in Southeast Asia and beyond
