Translating Egypt's Revolution The Language Of Tahrir Tahrir Studies Editions:

Translating Egypt's Revolution Samia Mehrez, 2012 The contributors to this volume have selectively translated chants banners jokes poems and interviews as well as presidential speeches and military communiqu s Their practical translation work is informed by the cultural turn in translation studies and the nuanced role of the translator as negotiator between texts and cultures The chapters focus on the relationship between translation and semiotics issues of fidelity and equivalence creative transformation and rewriting and the issue of target readership Publisher description *Translating the Language of the Syrian Revolution (2011/12)* Eylaf Bader Eddin, 2023-11-20 While the Arab revolutions have obviously triggered extensive social and political changes the far reaching consequences of the cultural and discursive changes have yet to be adequately considered For activists researchers and journalists the revolution was primarily a revolution in language a break with the linguistic oppression and the rigidity of the old regimes This break was accompanied by the emergence of new languages which made it possible to inform tell and translate the ongoing events and transformations This language of the revolution was carried out into the world by competing voices from Syria by local and foreign researchers activists and journalists The core of this project is to find the various translations of the language of the Syrian revolution 2011 2012 from Arabic to English to study and analyze In addition the discursive and non discursive dimensions of the revolution are to be seen as another act of translation including the language of the banners slogans graffiti songs and their representation in English

Between English and Arabic Bahaa Abulhassan, 2014-06-02 This book offers a challenging and stimulating perspective on translation It is a comprehensive practical course in translation between English and Arabic and as such will be invaluable to students of translation Based on contrastive linguistics it features a variety of translation key concepts including lexical grammatical and stylistic issues The book balances theory and application in translation The book is the result of the many courses the author has taught to students of Arabic English translation and will help bilingual speakers become familiar with translation techniques and develop practical translation skills to the same standard as that expected of a university graduate It presents a remarkable selection of examples of English Arabic translation Through lexical research glossary building and an introduction to key theoretical concepts in translation the reader will gain a better understanding of what graduate level translation involves

Archives, Museums and Collecting Practices in the Modern Arab World Sonja Mejcher-Atassi, John Pedro Schwartz, 2016-05-23 Collecting has a long tradition in the Middle East but the museum as a public institution is relatively new Today there are national museums for antiquities in most Arab countries While in some cases the political and social climate has hindered the foundation of museums with existing collections even destroyed at times the recent museum boom in the Gulf States is again changing the outlook This unique book is the first to explore collecting practices in archives and museums in the modern Arab world featuring case studies of collecting practices in countries ranging from Egypt and Lebanon to Palestine Jordan Iraq and the Gulf and providing a theoretical and

methodological basis for future research The authors are also concerned with investigating the relationship between past and present since collecting practices tell us a great deal not only about the past but also about the ways we approach the past and present conceptions of our identities Collections can be textual as well as in the stories memories or events selected recalled and retold in the pages of a text As interest in memory studies as well as popular and visual culture grows in the Arab World so collecting practices are at the heart of any critical approach to the past and the present in that region The book will be of great interest not only to scholars and students of the modern Arab world but also to professionals in museums and collections in the region as well as around the world

From the 1919 Revolution to the 2011 Arab Spring Uzi Rabi,Mira Tzoreff,2024-05-08 Focused on three Egyptian revolutions in 1919 1952 and 2011 this edited book argues that each of these revolutions is a milestone which represents a meaningful turning point in modern Egyptian history Revolutions are typically characterized by a fundamental change in political and social infrastructures as well as in the establishment of new values and norms However it should be noted that this may not be entirely applicable when examining the context of the three Egyptian revolutions the 1919 revolution failed to liberate Egypt from British colonial hegemony the 1952 revolution failed to rework the country s social and economic systems and unify the Arab world and the Arab Spring revolution of 2011 culminated in a chaotic economic and social catastrophe thus failing to solve the young generation s crisis Nevertheless by revisiting and re defining these revolutions through diverse theoretical frameworks the book proposes that each of them played a significant role in shaping Egypt s political social and cultural identity This book is specifically of interest for students historians and social scientists with a keen interest in Egyptian history and the Middle East offering fresh perspectives and insights into these transformative moments in Egypt s history

Historical Dictionary of the Arab Uprisings Aomar Boum,Mohamed Daadaoui,2020-03-10 The Arab uprisings that swept the Middle East and North Africa in the period from 2011 2012 left an indelible mark on the socio political landscape of the region But that mark was not consistent across the region while some countries underwent dramatic popular social and political changes others teetered on the brink or were left with the status quo intact Street revolutions toppled despotic regimes in Tunisia Libya and momentarily in Egypt while mounting serious challenges to authoritarian regimes in Syria and Yemen Algeria s entrenched bureaucratic cum military authoritarian system proved resilient until the recent events of early 2019 which forced the resignation of President Abdelaziz Bouteflika before the end of his term on 28 April 2019 As in Algeria protestors in Sudan succeeded after months of demonstrations in overthrowing the government of Omar al Bashir Several Arab monarchies still appear stable and have managed to weather the tempest of the Arab revolutions albeit not without fissures showing in the edifice of their states accompanied by some minor constitutional changes Where Tunisians Egyptians Yemenis Syrians and Libyans demanded regime changes in their political systems protesters in the Arab monarchies have called on the kings and emirs to reform their political system from the top down indicating the sizeable monarchical advantage
