### **Transnational Identities Becoming European In The Eu Governance In Europe Series:**

**Transnational Identities** Richard K. Herrmann, Thomas Risse, Marilyn B. Brewer, 2004-05-17 This original work explores the increasingly important phenomenon of the formation of transnational identity Considering the ongoing relevance of the European Union the contributors ask a series of intriguing questions Is a European identity possible How are the various types of European identity formed and maintained How are these identities linked to the process of European integration Examining the psychological institutional and political mechanisms that encourage or impede identification with transnational groups the book considers these theoretical questions in light of new evidence drawn from a rich body of primary research including field experiments in depth interviews with elites and public opinion surveys Brought together for the first time social psychologists sociologists political scientists and ethnographers share their theoretical and methodological perspectives in tackling the common issues surrounding the emergence of European as a political identity Paying special attention to the role of the institutions of the EU the authors investigate the impact of neo functionalist strategies and find that the processes of identity formation are far more complicated than can be explained by material and institutional factors alone The authors engage in a fruitful dialogue about how much a European identity exists and how much it matters as they delve into the sources of disagreement and their implications *Europe, Migration and Identity* Jan Logemann, Donna Gabaccia, Sally Gregory Kohlstedt, 2015-10-14 This volume explores connections between migration studies and research in the history of Europeanization and Europeaness areas which have generated much interest in recent years Beyond histories of European political integration and the intellectual and elite movements that have supported this process scholars increasingly pay attention to the constructed nature of Europeaness and European identities and to the multiplicity of ways in which this construction happens Migrants can be a particularly useful lens on Europeanization processes as they provide a perspective from the periphery in two ways by providing a view literally from the outside as in the case of those who left the continent or by providing a view from the margins of the European societies within which they live The collection asks what Europe meant to migrants abroad particularly within the transatlantic context and within the continent during the twentieth century Contributions from a variety of disciplinary perspectives reflect both on the broader historical context and theoretical implications and highlight specific cases such as those of European labor migrants to the United States of transatlantic exiles and migrants of Latin American immigrants in present day Europe as well as the experience of highly skilled migrants within the context of the European Union Can we trace the emergence of European identities among different groups of migrants and if so what forms did they take This book was originally published as a special issue of *National Identities* **The Routledge International Handbook of Intercultural Arts Research** Pamela Burnard, Elizabeth Mackinlay, Kimberly Powell, 2016-01-08 For artists scholars researchers educators and students of arts theory interested in culture and the arts a proper understanding of the questions surrounding interculturality and the arts requires a full

understanding of the creative methodological and interconnected possibilities of theory practice and research The International Handbook of Intercultural Arts Research provides concise and comprehensive reviews and overviews of the convergences and divergences of intercultural arts practice and theory offering a consolidation of the breadth of scholarship practices and the contemporary research methodologies methods and multi disciplinary analyses that are emerging within this new field *European Identity Revisited* Viktoria Kaina,Ireneusz Pawel Karolewski,Sebastian Kuhn,2015-12-14 It has been argued that the emergence of a European collective identity would help overcome growing disparity caused by the increasing diversity of today s European Union with 28 member states and more than 500 million people Research on European integration is facing the pressing question of what holds Europe together in times of crisis growing distributional conflict and instability in its neighbourhood This book departs from the ideas of group cohesion in the EU and reflects on the newest dynamics and practices of European identity Whilst applying innovative qualitative quantitative and experimental research methods and an interdisciplinary approach this volume looks at a variety of issues such as European citizenship mobility of European citizens space based identities dual identities student identity and value sharing In doing so this volume presents new perspectives on this complex and dynamic subject and points to potential solutions both in the academic discourse and the political practice of the EU This text will be of key interest to scholars and students of European integration European studies international relations citizenship studies political sociology as well as more broadly in the social sciences *The Single Currency and European Citizenship* Giovanni Moro,2013-02-28 Established in 2002 the Euro is now the currency of 17 countries used by over 335 million people daily Although the single currency is much discussed in terms of macroeconomics and global finances policymakers rarely address its impact on European citizenship in social cultural political and everyday life economics terms This hidden side of the single currency is the focus of the essays which use various approaches from economic history and political sociology to citizenship and legitimacy to reveal the connections between the Euro and European citizenship This timely contribution by renowned experts provides a greater understanding of the Euro at a time when it is not clear whether it should be celebrated or commemorated and looks into aspects of the single currency that are the base of the social trust that supports it and that is at stake in the present crisis It will be an essential tool to anyone studying the political social and economic development of the E U What is Europe? Anna Triandafyllidou,Ruby Gropas,2022-10-07 This authoritative yet accessible introduction to understanding Europe today moves beyond accounts of European integration to provide a wide ranging and nuanced study of contemporary Europe and its historical development This fully updated edition adds material on recent developments such as Brexit and the migrant and Eurozone crises The concept of Europe is instilled with a plethora of social cultural economic and political meanings Throughout history and still today scholars writing on Europe and politicians involved in national or European politics often disagree on the geographic limits of this space and the defining elements of Europe Europe is therefore first and foremost a

concept that takes different shapes and meanings depending on the realm of life on which it is applied and on the historical period under investigation At a given point in time depending on the perspective we adopt and the situation in which we find ourselves Europe may represent very different things Thus we should better talk about Europes in plural What is Europe explores these evolving conceptions of Europe from antiquity to the present This book is all the more timely as Europe responds to the Russian invasion of Ukraine and Britain's departure from the European Union financial slump refugee emergencies and the COVID 19 pandemic This book offers a fully updated introduction to European studies from an interdisciplinary perspective It is a crucial companion to any undergraduate or graduate course on Europe and the European Union The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Handbook of European Policies** Hubert Heinelt, Sybille Münch, 2018-01-26 This definitive Handbook addresses the current lack of research into European policymaking and development using an interpretive perspective Questioning areas that mainstream approaches tend to neglect contributors target the ways in which ideas arguments and discourses shape policies in the institutional context of the EU

**Is Europe Listening to Us?** Raphaël Kies, 2016-05-06 How can the European Union engage and connect with the people it aims to represent What initiatives and schemes have been used to engage EU citizens To what extent can such procedures be considered a move forward towards a more participative and democratic Europe This collection of internationally recognised specialists in European integration and innovative democratic practices seek to answer these key questions explore European citizens thoughts and opinions about the EU and evaluate the governing elite's attempts to engage with the public It offers critical analysis of EU justifications and strategies for implementing Deliberative Citizens Involvement Projects and focuses on some of the major participative experiences trialled and implemented by EU institutions By comparing these different attempts to increase and bolster the participation of EU citizens and evaluating their impact the book offers valuable and original material on the civic involvement of EU citizens and the legitimacy of the EU decision making process

**The Europe of Elites** Heinrich Best, György Lengyel, Luca Verzichelli, 2012-03-29 The Europe of Elites is the first comprehensive study of how European political and economic leaders think and feel about Europe and about what course future European integration should take

**Constructing the EU's Political Identity** Sabine Saurugger, Mark Thatcher, 2022-10-23 This book examines the construction of the EU's political identity or identities variations in its strength and the nature of its content Drawing on studies both on European nation state formation and on the EU's identity the chapters take a top down approach and analyse how EU institutions in different major policy domains have themselves sought to create political identity through policy making The authors define the construction of EU political identity and set out empirically applicable indicators to assess political identity in policy making They analyse the construction of identity through a process oriented approach that explicitly includes contestation and the existence of rival political identities Comparing across policy domains

the contributions suggest that the ability of EU institutions to construct an EU political identity has been limited not only by existing national identities but also by the coexistence of rival EU political identities within policy domains. Hence it has been difficult for EU institutions to establish a strong identity with identity being strongest where there are clear external alternatives and limited rival identities within the EU.
