Transport For Suburbia Beyond The Automobile Age:

Transport for Suburbia Paul Mees, 2009-12 The need for effective public transport is greater than ever in the 21st century With countries like China and India moving towards mass automobility we face the prospects of an environmental and urban health disaster unless alternatives are found It is time to move beyond the automobile age But while public transport has worked well in the dense cores of some big cities the problem is that most residents of developed countries now live in dispersed suburbs and smaller cities and towns These places usually have little or no public transport and most transport commentators have given up on the task of changing this it all seems too hard This book argues that the secret of European style public transport lies in a generalizable model of network planning that has worked in places as diverse as rural Switzerland the Brazilian city of Curitiba and the Canadian cities of Toronto and Vancouver It shows how this model can be adapted to suburban exurban and even rural areas to provide a genuine alternative to the car and outlines the governance funding and service planning policies that underpin the success of the world's best public transport systems Back cover

Design, User Experience, and Usability: Theories, Methods, and Tools for Designing the User Experience Aaron Marcus, 2014-05-16 The four volume set LNCS 8517 8518 8519 and 8520 constitutes the proceedings of the Third International Conference on Design User Experience and Usability DUXU 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 jointly with 13 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 256 contributions included in the DUXU proceedings were carefully

reviewed and selected for inclusion in this four volume set The 66 papers included in this volume are organized in topical sections on design theories methods and tools user experience evaluation heuristic evaluation media and design design and creativity

Governance and Sustainable Urban Transport in the Americas Jean Mercier, Fanny Tremblay-Racicot, Mario Carrier, Fábio Duarte, 2018-09-29 This volume explores the governance patterns of three cities of the Americas Seattle Montreal and Curitiba which all present different but interesting cases in dealing with sustainable urban transport challenges The authors study empirical data from these three cities to analyze how specific governmental and policy instruments planning consultation and market mechanisms for example were implemented in each case Through concepts coming from policy studies and sociology for example such as path dependency institutional culture and transaction costs the three cities are also looked at in a broader perspective in order to better understand how they deal differently with their common challenges

Public City Beau B Beza, Brendan Gleeson, 2014-11-25 Paul Mees urban ideal counted on watchful confident and well informed citizenry to work collectively in a quest for fair and just cities As such The Public City is largely a critique of neo liberalism and its arguably negative influence on urban prospects As Mees explained it neo liberal urbanism was much more than a political aberration it was a threat that imposed many costly failures in an age overshadowed by grave ecological challenges Fifteen of Australia and New Zealand s leading urban scholars including Professor Emeritus Jean Hillier and Professor Brendan Gleeson have contributed to this collection The Public City includes a foreword by the late Professor Sir Peter Hall a world leader in urban planning from Britain Kenneth Davidson one of Australia s top economic columnists has also contributed a chapter The collective works in this book extend beyond an analysis of urban patterns to provide a blueprint for the improvement of civic and institutional purpose in the creation of the public city

Planning and Design for Sustainable Urban Mobility Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements

Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter

Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change **The Routledge Handbook of Urban Design Research Methods** Hesam Kamalipour, Patricia Aelbrecht, Nastaran Peimani, 2023-08-24 As an evolving and contested field urban design has been made unmade and remade at the intersections of multiple disciplines and professions It is now a decisive moment for urban design to reflect on its rigour and relevance This handbook is an attempt to seize this moment for urban design to further develop its theoretical and methodological knowledge base and engage with the question of what urban design can be with a primary focus on its research This handbook includes contributions from both established and emerging scholars across the global North and global South to provide a more field specific entry point by introducing a range of topics and lines of inquiry and discussing how they can be explored with a focus on the related research designs and methods The specific aim scope and structure of this handbook are appealing to a range of audiences interested and or involved in shaping places and public spaces What makes this book quite distinctive from conventional handbooks on research methods is the way it has been structured in relation to some key research topics and questions in the field of urban design regarding the issues of agency affordance place informality and performance In addition to the introduction chapter this handbook includes 80 contributors and 52 chapters organised into five parts The commissioned chapters showcase a wide range of topics research designs and methods with references to relevant scholarly works on the related topics and methods **Human Transit, Revised Edition** Jarrett Walker, 2024-02-06 The first edition of Human Transit published in 2011 has become a classic for professionals advocates and interested citizens Walker has updated and expanded the book to deepen its explanations New topics include the problem with specialization the role of flexible or demand response services how to know when to redesign your network and responding to tech industry claims that transit will soon be obsolete Finally he has also added a major new section exploring the idea of access to opportunity as a core measure of transit's success No other book explains the basic principles of public transit in such lively and accessible prose all based on a respect for your right to form your own opinion Walker's goal is not to make you share his values but to give you the tools to clarify and advocate for yours Bicycle Justice and Urban Transformation Aaron Golub, Melody Hoffmann, Adonia Lugo, Gerardo Sandoval, 2016-07-15 As bicycle commuting grows in the United States the profile of the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the cycling public is actually quite diverse with the greatest share falling into the lowest income categories Bicycle Justice and Urban Transformation demonstrates that for

those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy

The Future of Cities and Regions Liliana Bazzanella, Luca Caneparo, Franco Corsico, Giuseppe Roccasalva, 2012-03-22 This guide for tomorrow's urban practitioner systematically explains fifteen best practices across three continents it explores questions of broad interest for designing and planning the future of cities and regions Key questions addressed are Is simulation useful to explore the effects of different design policy and planning strategies Which approach will help manage the uncertainties of metropolitan areas both today and tomorrow What are the strengths and weaknesses of the different simulation practices for city leadership public and private partnership and citizen involvement The book reviews computer models and media socio political initiatives professional practices which help communicating the future effects of different design political and planning strategies with a wide range of aims from information through consultation towards active participation These world best practices are considered according to four leading issues for urban and regional development respectively Simulation Scenario and Visioning Government and Governance and Scale The book examines the approaches adopted technically and procedurally The selected knowledge and the innovative tools used in each case study are among the most advanced and up to date in the professional and research fields This volume successfully illustrates these innovative practices and methodologies in a straightforward and accessible way
