Traumatic Brain Injury Rehabilitation Rudi Coetzer, 2006 Clinical neuropsychology and neuro rehabilitation are disciplines that have truly developed at a phenomenal pace over the last couple of decades Practitioners have had to make a continued commitment to staying up to date There are many exciting theoretical clinical and technological developments within the field However central to all of these remains the issue of working with persons who have experienced an extreme life changing experience Often persons struggle to make sense of a traumatic brain injury and live life as it is for them now

Because of improved acute medical care there are more survivors of traumatic brain injury today than ever before. Traumatic brain injury and the resulting disability constitute a major loss for the individual. Assisting persons with coming to terms with the changes after traumatic brain injury is probably one of the essential tasks in many rehabilitation programs. Taking a longer term view regarding outcome. This book represents how neuro rehabilitation has evolved over the past decade and includes exciting new studies in this field. Manual of Traumatic Brain Injury, Third Edition Felise S. Zollman, 2021-07-22

The third edition of Manual of Traumatic Brain Injury offers a thorough revision of the popular evidence based guide to understanding and managing all levels of traumatic brain injury. Comprehensive in scope and concise in format, this reference describes the spectrum of injury from mild to severe and the continuum of care from initial injury to management of chronic sequelae. Chapters are designed with a practical clinical focus for targeted retrieval of content by topic area and for self review. The text is organized into five sections. Part I addresses fundamental concepts necessary for understanding the underpinning of clinical decision making. Part II is dedicated to mild TBI including sport related concussion with chapters covering topics from natural history to associated somatic disorders, post concussion syndrome and PTSD. Part III covers moderate to severe TBI and details prehospital emergency and ICU care, rehabilitation, treatment of related conditions and postinjury outcomes. Part IV focuses on TBI related complications including posttraumatic seizures, spasticity, behavioral and sleep disturbances and chronic traumatic encephalopathy (CTE). Part V reviews special considerations in selected populations such as pediatric TBI and TBI in the military as well as medicolegal and ethical considerations in TBI, complementary and alternative medicine and return to work considerations. Each chapter includes boxed Key Points which underscore major clinical takeaways, Study Questions to facilitate self assessment and further emphasize core chapter content and an Additional Reading list for a deeper dive into chapter concepts. Significant updates incorporating recent advancements in the field combined with the clinical acumen of its experienced contributors make this third edition the essential manual for healthcare professionals caring for individuals with traumatic brain injury. Key Features: Succinct format encourages targeted access to key clinical information. Completely revised and updated third edition reflects current state of the art advancements. Added content areas such as a new chapter dedicated to substance abuse and TBI expand the scope of material addressed. Newly added multiple choice Study Questions in each chapter facilitate self assessment of mastery of chapter material.
