Collecting and Provenance Jane Milosch, Nick Pearce, 2019-10-28 The study of provenance the history of the creation and ownership of an artefact work of art or specimen provides insights into the history of taste and collecting illuminating the social economic and historic trends in which an object was created and collected It is as much a history of people as it is of objects and its study often reveals intricate networks of relationships patterns of activity and motivations This book promotes the study of the history of collecting and collections in all their variety through the lens of provenance and explores the subject as a cross disciplinary activity Perhaps for the first time in a publication it draws on expertise ranging from art history and anthropology to natural history and law looking at periods from antiquity through the 18th century and the Holocaust era to the present and materials from Europe and the Americas to China and the Pacific The issues raised are wide ranging touching on aspects of authenticity cultural meaning and material transformation and economic and commercial drivers as well as collector and object biography The book fills a gap in the study of collecting and provenance taking the subject holistically and from multiple standpoints better to reflect the widening interest in provenance from a range of disciplinary perspectives This book will be a service to the field from established scholars and museum professionals to students of collecting history cultural heritage and museum studies Insular Iconographies Meg Boulton, Michael D. J. Bintley, 2019 Essays on aspects of iconography as manifested in the material culture of medieval England Professor Jane Hawkes has devoted her career to the study of medieval stone exploring its iconographies symbolic significances and scholarly contexts and shedding light on the obscure and understudied sculpted stone monuments of Anglo Saxon England This volume builds on her scholarly interests offering new engagements with medieval culture and the current scholarly methodologies that shape the discipline The contributors approach several significant objects and texts from the early and later Middle Ages working across several disciplinary backgrounds and periods largely focusing on the Insular World as it intersects with wider global contexts of the period The chapters cover a wide range of subjects from the material culture of baptism to the material symbolic and iconographic consideration of the artistic outputs of the Insular world with essays on sculpture metalwork glass and manuscripts to ideas of stone and salvation in both material and textual contexts to intellectual puzzles and patterns both material and mathematic to consideration of the ways in which the conversion to Christianity played out on the landscape MEG BOULTON is Research Affiliate and Visiting Lecturer in the History of Art Department at the University of York MICHAEL D J BINTLEY is Lecturer in Early Medieval Literature and Culture at Birkbeck University of London Contributors Elizabeth Alexander Michael Brennan Melissa Herman Mags Mannion Thomas
