King, 2013-11-11 The beauty of mathematics eludes all but a small select handful of people This monumental classic will illuminate the aesthetic delights of mathematics for all to behold Why should only a tiny aristocracy hold the key to appreciating the elegance of mathematics Why should intelligent cultured people who can easily articulate the brilliance of Shakespeare's imagery quake at the prospect of deciphering a simple algebraic formula Jerry King a mathematics professor and a poet razes the barriers between a world of two cultures and hands us the tools for appreciating the art and treasures of this elegant discipline In his fluid poetic voice he initiates us into the splendid wonders of the Mathworld He provides us with an original framework for contemplating mathematics as art He deepens our ultimate comprehension of art by comparing the beauty of a Rembrandt as well as a Jackson Pollock with the riches to be mined in an elegant proof Like the great philosophers of the past Dr King searches for pure Truth a quest possible today only in the realm of mathematics With his infectious enthusiasm he explains with utmost clarity the intellectually stimulating underpinnings of both pure and applied mathematics He goes on to decry how our educational system has failed by perfunctorily teaching us mathematics depriving us of the pillars of beauty upon which mathematics rests Never before has a book spoken so eloquently to our soul in instilling an appreciation for the grandeur of mathematics Through Dr King the muses of mathematics will no longer sing for others and not for us The elegant world of mathematics awaits us all to savor

Bernstein, 2022-09-29 The relation between humans and nature is at the core of the great existential threats of our time from climate change extreme weather and environmental destruction to devastating pandemics We are becoming increasingly aware of the fact that unless we change our behavior radically and quickly the most likely outcome will be the destruction of countless species and forms of life including our own But we also need to change the way we think about nature and think about the relation between humans and nature this is a key intellectual task In this important book Richard J Bernstein argues that an adequate conception of humans and nature capable of facing up to the existential threats of our time requires taking full account of the major projects dealing with nature in the past Focusing on key figures of modernity Spinoza Hume Kant Hegel Marx Nietzsche and Freud Bernstein reconstructs their conceptions of nature and uncovers the reasons that led them to their distinctive views Working through the contradictions and incompatibilities among these diverse thinkers Bernstein identifies common themes that have shaped their struggles in dealing with the relation of humans to nature He offers a critical overview of the challenges illuminated by each perspective that must be confronted in our thinking of nature today As a prolegomenon to rethinking humanity and nature this book uncovers the rich conceptual resources available within the modern tradition that can help us to develop an adequate understanding of nature for our time Matriculation Mathematics 1 Siak Peng Cheng, Zulkifli Montak, Norsaadah Ab.
