Science of Food Nutrition and Health Vinod Puri, 2023-07-21 Diet is one of the important facets of comprehensive approach to good health along with physical social emotional and intellectual well being During the second half of the 20th century we witnessed a dramatic change in our eating patterns and lifestyle aided by agricultural and industrial revolution globalisation and urbanisation and emergence of associated diet related chronic diseases such as obesity coronary heart disease hypertension diabetes some type of cancer stroke and degenerative arthritis The science of food and nutrition is very complex Nutrition science like many other fields of science is evolutionary and there are always conflicting research outcomes that need to be carefully evaluated We ingest hundreds of dietary components every day and understanding various metabolic pathways and the effect of interactions of various dietary components in vivo is rather challenging Recent advances in genetic research fostered the emergence of new disciplines such as nutrigenomics proteomics metabolomics and transcriptomics which can shed light on the molecular level interaction between dietary nutrients and the genome These technologies provide the vision for future nutrition research that may unravel how the diet genome interactions modifies the phenotype Food may not be the overall cure for the treatment of every possible disease but

the importance of food in both causing and relieving certain problems cannot be neglected This is one of the most researched topics and there is a lot written about it However this book is probably the only text that provides up to date information on the various interrelated topics on food and nutrition that would be of interest to wider community *Fat, Fifty, and Finished* Caroline Pledger,2018-04-20 Fat fifty finished where are you now is a social commentary regarding all aspects of health and how each component works in unison to create wellbeing and prosperity It encompasses the idea that you are the one that is truly responsible for your own health and wellbeing Despite where you may be on the disease continuum and regardless of age you have the ability to intervene to reverse and to regenerate to produce a sense of vitality Life experiences has taught me one major lesson Our choices conscious or otherwise has certainly dictated the circumstances in our lives It is how we deal with the circumstances that matter Although the Authors intention is honorable and for the good of all beings it is somewhat or at least she has been told as subtle as a sledge hammer to remind ourselves that there is personal accountability regarding health and your own perception of health Health begins in the library of the mind and is affected by our internal physiology and our external environment Perhaps a rehash of old news but it is much easier to check up with yourself now and again and create better choices before you get to the stage where you are fat fifty and nearly finished
