Universit T Gesellschaft Universitat Aufbruch Jahrhundert:

Vivarium Gerd B. Muller, 2017-10-13 The scientific achievements and forgotten legacy of a major Austrian research institute from its founding in 1902 to its wartime destruction in 1945 The Biologische Versuchsanstalt was founded in Vienna in 1902 with the explicit goal to foster the quantification mathematization and theory formation of the biological sciences Three biologists from affluent Viennese Jewish families Hans Przibram Wilhelm Figdor and Leopold von Portheim founded financed and nurtured the institute overseeing its development into one of the most advanced biological research institutes of the time And yet today its accomplishments are nearly forgotten In 1938 the founders and other members were denied access to the institute by the Nazis and were forced into exile or deported to concentration camps The building itself was destroyed by fire in April 1945 This book rescues the legacy of the Vivarium as the Institute was often called describing both its scientific achievements and its place in history The book covers the Viennese sociocultural context at the time of the Vivarium s founding and the scientific zeitgeist that shaped its investigations It discusses the institute s departments and their research topics and describes two examples that had scientific and international ramifications the early work of Karl von Frisch who in 1973 won the Nobel Prize in Physiology or Medicine and the connection to Cold Spring Harbor Laboratory in New York Contributors Heiner Fangerau Johannes Feichtinger Georg Gaugusch Manfred D Laubichler Cheryl A Logan Gerd B M ller Tania Munz K rin Nickelsen Christian Rei Kate E Sohasky Heiko Stoff Klaus Taschwer Climbing up the Social Ladder? Vlad Popovici, Alice Velková, Martin Klečacký, 2024-10-21 Social mobility is about climbing the societal ladder or switching to a better more promising or rewarding position But how does this work for those already atop or very close to it Climbing up the Social Ladder explores instances of social mobility among different types of positional decisional and status defined elites in East Central Europe during the long 19th century at individual or group level **Global Inequality**, 2025-08-28 The book contributes to a better understanding of the relationship between globalisation and transnationalisation and the development of social inequality It addresses this challenge in the current transition to a multi centred world The contributions by international experts from different continents and different disciplines bring together current research on global inequality and social classes covering a wide variety of thematic and spatial foci This also includes a comparison of analyses of inequality in a global context By bringing together analyses of inequalities in income wealth education political influence labor conditions and socio ecological inequalities among others the volume provides deeper insights into the ways in which global social inequalities are changing yet being reproduced in many ways in the 21st century It calls for a discussion on the global dimensions of unequal power relations **Reexamining Academic Freedom in Religiously Affiliated Universities** Kenneth Garcia, 2016-12-21 Kenneth Garcia presents an edited collection of papers from the 2015 conference on academic freedom at religiously affiliated universities held at the University of Notre Dame These essays reexamine the secular principle of academic freedom and discuss how a theological understanding might build

on and further develop it The year 2015 marked the 100th anniversary of the founding of the American Association of University Professors AAUP the leading advocate of academic freedom in America In October 2015 the University of Notre Dame convened a group of prominent scholars to consider how the concept and practice of academic freedom might evolve The premise behind the conference was that the current conventional understandings of academic freedom are primarily secular and therefore not yet complete The goal was to consider alternative understandings in light of theological insight Theological insight in this context refers to an awareness that there is a surplus of knowledge and meaning to reality that transcends what can be known through ordinary disciplinary methods of inquiry especially those that are quantitative or empirical Essays in this volume discuss how in light of the fact that findings in many fields hint at connections to a greater whole scholars in any academic field should be free to pursue those connections Moreover there are religious traditions that can help inform those connections

The Russian Orthodox Church and Modernity Regina Elsner, 2021-10-20 The Russian Orthodox Church ROC faced various iterations of modernization throughout its history This conflicted encounter continues in the ROC s current resistance against what it perceives as Western modernity including liberal and secular values This study examines the historical development of the ROC s arguments against and sometimes preferences for modernization and analyzes which positions ended up influencing the official doctrine The book s systematic analysis of dogmatic treatises shows the ROC s considerable ability of constructive engagement with various aspects of the modern world Balancing between theological traditions of unity and plurality the ROC s today context of operating within an authoritarian state appears to tip the scale in favor of unity

The Numinous and Modernity Todd A. Gooch, 2000 The author traces the development of Rudolf Otto s attempt to construct a normative science of religion This should respond to concerns facing Protestant theologians in Germany at the turn of the century Moreover he examines the reception of Otto s ideas after World War One The volume contains name and subject indexes

Imperial Culture in Germany, 1871-1918 Matthew Jefferies, 2020-10-01 It has often ben suggested that artists and writers in Germany s imperial era shunned social engagement preferring instead apolitical introspection However as Matthew Jefferies reveals whether one

looks at the painters poets and architects who helped to create an official imperial identity after 1871 the cultural critics and reformers of the later 19th century or the new generation of cultural producers that emerged in the years around 1900 the social political and cultural were never far apart In this attractively illustrated book Jefferies provides a lively introduction to the principal movements in German high culture between 1871 and 1918 in the context of imperial society and politics He not only demonstrates that Germany's Imperial culture was every bit as fascinating as the much better known Weimar culture of the 1920s but argues that much of what came later has origins in the imperial period Filling a significant gap in the current historiography this study will appeal to all those with an interest in the rich and diverse culture of Imperial Germany
