interdisciplinary evaluation of loneliness that examines the relation of consciousness to loneliness. It views loneliness from the inside as a universal human condition rather than attempting to explain it away as an aberration, a mental disorder, or a temporary state to be addressed by superficial therapy and psychiatric medication. Loneliness is much more than just feeling sad or isolated. It is the ultimate ground source of unhappiness, the underlying reality of all negative human behavior that manifests as anxiety, depression, envy, guilt, hostility, or shame. It underlies aggression, domestic violence, murder, PTSD, suicide, and other serious issues. This book explains why the drive to avoid loneliness and secure intimacy is the most powerful psychological need in all human beings, documents how human beings gravitate between two motivational poles, loneliness and intimacy, and advocates for an understanding of loneliness through the principles of idealism, rationalism, and insight. Readers will understand the underlying theory of consciousness that explains why people are lonely, thereby becoming better equipped to recognize sources of loneliness in themselves as well as others. Written by a licensed social worker and former mental health therapist, the book documents why whenever individuals or groups feel lonely, alienated, estranged, disenfranchised, or rejected, they will either withdraw within and shut down or they will attack others with little thought of consequence to either themselves or others. Perhaps most importantly, the work identifies the antidotes to loneliness as achieving a sense of belonging, togetherness, and intimacy through empathic emotional attachments which come from a mutual sharing of lived experiences such as feelings, meanings, and values, constant positive communication, and equal decision making.

Written collaboratively by two clinical psychologists, an academic psychologist, and a theologian, this book paves the way for psychotherapeutic practice that builds on Christian principles as the foundation rather than merely adding them to treatment as an afterthought.

Psychoanalytic Psychotherapy Nancy McWilliams, 2004-03-18 Building on the enormous popularity of her two previous texts on diagnosis and case formulation, this important work from Nancy McWilliams completes the trilogy by addressing in detail the art and science of psychodynamic treatment. McWilliams distills the essential principles of clinical practice, including effective listening and talking, transference and countertransference, emotional safety, and an empathic, attuned attitude toward the patient. The author describes the values, assumptions, and clinical and research findings that guide the psychoanalytic enterprise and shows how to integrate elements of other theoretical perspectives when necessary. She also discusses the phases of treatment and covers such neglected topics as educating the client about the therapeutic process, handling complex challenges to boundaries, and attending to self-care.

Presenting complex clinical information in personal nontechnical language enriched by in depth clinical vignettes this is an essential psychoanalytic work and training text for therapists
