Transcultural Turbulences Christiane Brosius,Roland Wenzlhuemer,2011-09-25 Today hardly anything moves as fast across the globe as images and media This fact opens new avenues to explore social and cultural change but also poses new theoretical challenges of how to grasp and better understand these changes and flows Moreover such movements across geophysical and cultural borders have a historical depth that enables us to explore globalisation and localisation in new ways Transculturality is still a relatively new field of research in the Humanities through which we sharpen our competence and literacy to come to terms with the complexity of globalised cultures This volume ventures into new domains of research on the transculturality of images and addresses the need to develop new or modify established often ethno and Eurocentric interpretations of what happens when images travel It does so by bringing together cutting edge research from fields such as art history cultural anthropology colonial history Islamic studies religious studies and literary criticism **Transcultural Turbulences** ,2011-09-25 *Theoretical Turbulence in Intercultural Communication Studies* Garry Robson,2014-07-03 A number of researchers trainers and educators in intercultural communication acknowledge that the most popular models and theories of the field are insufficient even unsuitable to describe or explain our practical multicultural experiences today This collection of articles offers new insights and critical evaluations of intercultural communication theory and research Authors from a variety of disciplines discuss for example methodological concerns Chinese exceptionalism micro and macro level interactions ways to teach and study perceptions and self awareness and also provide new constructions for understanding communication and culture and their relationship Cosmopolitanism Zlatko Skrbis,Ian Woodward,2013-04-29 *Cosmopolitanism Uses of the Idea* offers an illuminating and dynamic account of an often confusing and widespread concept Bringing together both historical and contemporary approaches to cosmopolitanism as well as recognizing its multidimensional nature Zlatko Skrbis and Ian Woodward manage to show the very essence of cosmopolitanism as a theoretical idea and cultural practice Through an exploration of various social fields such as media identity and ethics the book analyses the limits and possibilities of the cosmopolitan turn and explores the different contexts cosmopolitanism theory has been and still is applied to Critical diverse and engaging the book successfully answers questions such as How can we understand cosmopolitanism What is the relationship between cosmopolitanism and ethics What is the relationship between cosmopolitanism and identity How do cosmopolitan networks come into being How do we apply cosmopolitanism theory to contemporary digital and mediated societies This comprehensive and authoritative title is a must for anyone interested in cultural consumption contemporary citizenship and identity construction It will be especially useful for students and scholars within the fields of social theory ethics identity politics cultural diversity and globalisation *Sex Work in Nepal* Lisa Caviglia,2017-09-05 This book explores sex work in Nepal as a social and analytical category Narrating stories of those subsumed under such definition it examines changes as well as continuities characterising socio cultural norms and

perceptions through an analysis of sexual consumption It also highlights the ways in which the development sector media and local community discourses frame sex work as a distinct category How does the work of development aid projects affect the understanding of the sex worker category How are visual and media images employed to mark spaces of perdition in the Nepalese urban setting and what forms of imagination do they trigger How are intimate practices and relations transformed by imported notions of love and how do standards of propriety related to such interactions shift This book attempts to answer some of these questions An in depth and intimate ethnography the book deconstructs the sex worker category against the backdrop of global influences within local urban surroundings and points to the contradictions therein Furthermore through thorough descriptions of the experiences agency decision making processes and lives of those labelled as sex workers the book challenges concepts such as deviance and victimhood It proposes a counternarrative by rethinking ideas of gender objectification marginality symbolic violence and discrimination This book will greatly interest researchers and scholars in women and gender studies sociology and social anthropology South Asian studies and social sciences as well as NGOs and those involved in the development sector

Dangerous Memory in Nagasaki Gwyn McClelland, 2019-09-10 On 9th August 1945 the US dropped the second atomic bomb on Nagasaki Of the dead approximately 8500 were Catholic Christians representing over sixty percent of the community In this collective biography nine Catholic survivors share personal and compelling stories about the aftermath of the bomb and their lives since that day Examining the Catholic community's interpretation of the A-bomb this book not only uses memory to provide a greater understanding of the destruction of the bombing but also links it to the past experiences of religious persecution drawing comparisons with the Secret Christian groups which survived in the Japanese countryside after the banning of Christianity Through in depth

interviews it emerges that the memory of the atomic bomb is viewed through the lens of a community which had experienced suffering and marginalisation for more than 400 years Furthermore it argues that their dangerous memory confronts Euro American centric narratives of the atomic bombings whilst also challenging assumptions around a providential bomb Dangerous Memory in Nagasaki presents the voices of Catholics many of whom have not spoken of their losses within the framework of their faith before As such it will be invaluable to students and scholars of Japanese history religion and war history
