and teachers are facing various challenges in a rapidly changing world. In such circumstances discussing and sharing concerns of mutual interest regarding policy practice and research is crucial to creating more sophisticated understandings of the various challenges as a first step in the improvement of education. While the future should not be imprisoned in the past, the past does provide valuable lessons that will undergo new iterations in constructing the future. The future will be multi-faceted and complex, and the different chapters included in this book are intended to provide important contributions from which to build the future of education. The different chapters provide readers with international perspectives, frameworks, and empirical evidence of legacies, continuities, and changes in educational policy practice and research in teaching, teacher education, and learning. We hope that they inspire the readers to build the future and to change their own professional realities.

Cheryl J. Craig, Ph.D., Professor, University of Houston, Houston, TX, USA
Secretary, ISATT

This book metaphorically captures the looking backward to the past, pressing forward to the future that typically takes place on celebratory occasions. It causes us to pause and remember even as we race toward a time unknown to us. In a sense, the authors featured in this book serve as tour guides pointing out legacies, continuities, and changes in teaching and teacher education. I strongly urge readers not only to peruse the chapters that follow but to distill them to their essences and to glean what is of value to be learned from them.

In conclusion, the ISATT Executive especially thanks the co-editors of this volume who have compiled a superb collection of chapters on a timely and relevant topic.

Cultures of Curriculum Pamela Bolotin, 2011-05-20

Using cultures of curriculum as a lens, this clear, compelling text reveals and critically examines the belief systems and classroom practices of curricular orientations in contemporary American society. It is designed to foster awareness, examination, and deliberation about the curricula planned for and carried out in classrooms and schools to inspire conversations about theory and practice as well as political, social, and moral issues and to expand critical consciousness about approaches to curriculum and practice. Readers are encouraged to give serious attention to the issues this book raises for them and to join with their colleagues, students, and communities in considering how to create curricula with purpose and congruent practices and to reculture classrooms and schools. A framework of inquiry is presented to facilitate such reflection and to accomplish these goals.

Cultures of Curriculum, Second Edition Introduces the field of curriculum studies by describing theories and questions pertinent to curriculum inquiry. Describes the process of curriculum leadership drawing from historical and contemporary research on curriculum change and transformation. Presents the concept of cultures of curriculum as a way of thinking of curriculum as cultural text encompassing histories, norms, beliefs, values, roles, and environments. Connects theory to practice by describing curricular orientations as depicted in practice, providing educators with approaches to instruction, planning, and assessment for creating intentional practices in classrooms and schools. Uses a heuristic that helps educators to understand curricular orientations, examine curriculum in classrooms and schools, and reflect upon their own beliefs and practices. Integrates moral and political discourse into discussions of

curriculum orientations so that educators can recognize question and challenge aims and actions by examining dominant paradigms and both their direct and unforeseeable influences upon schooling Changes in the second edition Four new chapters Narrowing the Curriculum current trends of standardization and high stakes testing Educating Through Occupations Deweyan progressive and career technical education Sustaining Indigenous Traditions Native American indigenous education Envisioning Peace peace global human rights environmental education Updates and pertinent scholarship in all chapters reflecting recent events and discourses Curricular cultures all are examples of progressive alternatives to traditional education New two part structure Curriculum Studies and Curricular Cultures **Curriculum**
