Transforming California A Political History Of Land Use And Development:

Transforming California Stephanie S. Pincetl, 2003-03-10 In *Transforming California* Stephanie Pincetl argues that the transformation of nature in order to enhance economic development lies at the heart of much of the state's recent history. She sees late twentieth century California on a path of continued environmental degradation gripped by cynicism about government. *Transforming California* describes the evolution of the state's institutions of government as they apply to land use and development and it shows how land use decisions affect people's quality of life and their daily interactions with each other and with their environment. Pincetl offers an alternative vision for the renewal of the democratic spirit and process in California and for a reconciliation with nature.

Ecosystems of California Harold Mooney, Erika Zavaleta, 2016-01-19 This long anticipated reference and sourcebook for California's remarkable ecological abundance provides an integrated assessment of each major ecosystem type its distribution structure function and management. A comprehensive synthesis of our knowledge about this biologically diverse state. *Ecosystems of California* covers the state from oceans to mountaintops using multiple lenses past and present flora and fauna aquatic and terrestrial natural and managed. Each chapter evaluates natural processes for a specific ecosystem describes drivers of change and discusses how that ecosystem may be altered in the future. This book also explores the drivers of California's ecological patterns and the history of the state's various ecosystems outlining how the challenges of climate change and invasive species and opportunities for regulation and stewardship could potentially affect the state's ecosystems. The text explicitly incorporates both human impacts and conservation and restoration efforts and shows how ecosystems support human well being. Edited by two esteemed ecosystem ecologists and with overviews by leading experts on each ecosystem this definitive work will be indispensable for natural resource management and conservation professionals as well as for undergraduate or graduate students of California's environment and curious naturalists.

Urban Geography in America, 1950-2000 Brian J.L Berry,James Wheeler,2014-05-01 Urban Geography in America offers a comprehensive historiography of this major field Compiling the best essays from the flagship journal Urban Geography it shows the evolution of the field from the 1950s to 2000 as it shifted from data driven social science modeling in the 1960s to the more critical perspectives of the 1970s to postmodernism in the 1980s to feminism and globalization in the 1990s It covers all the major trends and figures and features some of the most important names in the field Ultimately this will be a necessary reference for all scholars in the field and all graduate students taking introductory courses and preparing for their comprehensive exams

Flame and Fortune in the American West Gregory Simon,2017 Flame and Fortune in the American West creatively and meticulously investigates the ongoing politics folly and avarice shaping the production of increasingly widespread yet dangerous suburban and exurban landscapes The 1991 Oakland Hills Tunnel Fire is used as a starting point to better understand these complex social environmental processes The Tunnel Fire is the most destructive fire in terms of structures lost in California history More than 3 000 residential structures burned and 25 lives were lost Although this fire occurred in Oakland and Berkeley others like it sear through landscapes in California and the American West that have experienced urban growth and development within areas historically prone to fire Simon skillfully blends techniques from environmental history political ecology and science studies to closely examine the Tunnel Fire within a broader historical and spatial context of regional economic development and natural resource management such as the widespread planting of eucalyptus trees as an exotic lure for homeowners and the creation of hillside neighborhoods for tax revenue decisions that produced communities with increased vulnerability to fire Simon demonstrates how in Oakland a drive for affluence led to a state of vulnerability for rich and poor alike that has only been exacerbated by the rebuilding of neighborhoods after the fire Despite these troubling trends Flame and Fortune in the American West illustrates how many popular and scientific debates on fire limit the scope and efficacy of policy responses These risky yet profitable developments what the author refers to as the Incendiary as well as proposed strategies for challenging them are discussed in the context of urbanizing areas around the American West and hold global applicability within hazard prone areas
