Mercer,Tracy J. Trothen,2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest

radical expression sees Homo sapiens as the cousin perhaps the poorer cousin of a new Humanity 2.0 Man is replaced by Superman The contribution that Islam can make to this movement concerns the central question of what this Superman or Supermuslim would actually entail To look at what Islam can contribute we need not restrict ourselves to the Qur'an and the legal tradition but also reach out to its philosophical and literary corpus Roy Jackson focuses on such contributions from Muslim philosophy science and literature to see how Islam can confront and respond to the challenges raised by the growing movement of transhumanism

Religion and Human Enhancement Tracy J. Trothen, Calvin Mercer, 2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics
