Widdowson, 2004-06-03 Providing an introduction this work contains sections on the British Empire **On the Subject of English** Henry Widdowson, 2019-11-18 The globalized use of language calls into question conventional ways of thinking in linguistics applied linguistics and language pedagogy This book critically examines this thinking from an historical at times satirical perspective and proposes an alternative conceptualization The first section defines a number of key concepts about communication which are taken up in subsequent sections and shown to be relevant to the different but related areas of language study Issues about the relationship between linguistics and applied linguistics set the scene for a discussion of the nature of discourse and then how this bears on the understanding of the globalised use of English as a lingua franca The final section considers the implications of this perspective on communication for how the subject of English language teaching might be redefined The book is relevant for anyone who sees the need for a critical consideration of established concepts in linguistics and language pedagogy *Translation & Language Teaching* Kirsten

Malmkjær, 1998 For at least a century attitudes to the use of translation in language teaching have been predominantly negative the deprecators of the methodology having been particularly vocal at the turn of the 20th century and again in the 1960s and 70s Yet for all of this time translation has remained a significant component in the teaching of many languages in many parts of the world and the 1980s saw a revival of support for the practice among a number of applied linguists Language teaching for translators has been rather less contentious It has always been assumed that translators must know their languages thoroughly but little has been written about how they as a special group might be taught their languages In the final quarter of the 20th century attention among translation scholars and pedagogues has turned so decisively away from linguistics that even teaching translators about their languages and how they can be put to use has been frowned on in many quarters This book takes a fresh look at both issues Part One addresses the question of the place and nature of language teaching in translator training programmes Part Two deals with the issue of how translation might best be used as

a teaching and testing methodology in language classes Finally the papers in Part Three address the relationship between translation and language teaching from the somewhat divergent points of view of the translator trainer and language teacher
