[The Oxford Handbook of Evidence-based Crime and Justice Policy](#) Brandon Welsh, Steven N.

Zane, Daniel P. Mears, 2024. An evidence-based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good. However, the term evidence-based is characterized by a great deal of rhetoric. Indeed, there remains a marked disjuncture between calls for evidence-based policy and an understanding of what it means for policy to be evidence-based. The calls for evidence-based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational, cost-effective, and humane policies for the betterment of society. This handbook showcases the state of research on evidence-based crime and justice policy and the challenges that impede its creation and use. The volume has three core objectives: to promote new and productive ways to think about evidence-based policy; to demonstrate how research can contribute to and guide evidence-based policy in juvenile justice, criminal justice, and alternatives to system responses; and to identify strategies that can increase reliance on evidence-based policy. To meet these objectives, each chapter is guided by several central questions: What do we know about evidence-based policy and practice in crime and justice? How can we improve knowledge of evidence-based policy and practice? How can we promote more use of evidence-based policy and practice? Taken as a whole, the volume emphasizes the critical need for policies that are grounded in high-quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions. **Nuclear Medicine Physics** Aamir Shahzad, Sajad Bashir, 2019-07-24.
