The Translations of Nebrija Byron Ellsworth Hamann, 2015 In 1495 the Spanish humanist Antonio de Nebrija published a Spanish to Latin dictionary that became a best seller Over the next century it was revised dozens of times in nine European cities As these dictionaries made their way around the globe in this age of encounters their lists of Spanish words became frameworks for dictionaries of non Latin languages What began as Spanish to Latin became Spanish to Arabic French English Tuscan Nahuatl Mayan Quechua Aymara Tagalog and more Tracing the global influence of Nebrija s dictionary Byron Ellsworth Hamann in this interdisciplinary deeply researched book connects pagan Rome Muslim Spain Aztec Tenochtitlan Elizabethan England the Spanish Philippines and beyond revealing new connections in world history The Translations of Nebrija re creates the travels of people books and ideas throughout the early modern world and reveals the adaptability of Nebrija s text tracing the ways heirs and pirate printers altered the dictionary in the decades after its first publication It reveals how entries in various editions were expanded to accommodate new concepts such as for indigenous languages in the Americas a process with profound implications for understanding pre Hispanic art architecture and writing It shows how words written in the margins of surviving dictionaries from the Americas shed light on the writing and researching of dictionaries across the early modern world Exploring words and the dictionaries that made sense of them this book charts new global connections and challenges many assumptions about the early modern world [The Oxford Handbook of Ritual Language](#) David Tavárez, 2024-11-14 This volume brings together representative case studies and surveys that explore research into ritual language covering theoretical and methodological approaches that reflect traditional inquiries and more recent studies This recent literature contends that ritual language hinges on the construction of authoritative ontological models about the cosmos and its inhabitants Ritual speech also orchestrates performances that articulate representations of collective identities and rests on the diversity of hierarchical forms of authoritative knowledge displayed in both oblique and direct terms Moreover performances texts and narratives associated with ritual practices are closely entwined with historical accounts that navigate current memories recast in a diversity of ways about ancestral beings and distant or recent pasts or delimit a terrain in which dialectical relationships with colonial hegemony and Christian indoctrination emerge to transform the social order Ritual narrative often offers in its structure and delivery momentous representation of the social order social institutions social difference and collective identities and may also be constituted by claims about relations among species non human actors and material culture The Oxford Handbook of Ritual Language addresses foundational questions regarding the scope structuring use and consequences of ritual language The chapters examine the relationship between speakers consciousness and verbal ritual performances and between ritual language hegemony collective authority and the social world As the study of ritual speech hinges on extensive analyses of linguistic choices and styles the contributors draw on data from a wide range of language groups and societies in the Americas the

Middle East the Pacific South Asia and the Indian Ocean The Routledge Hispanic Studies Companion to Early Modern Spanish Literature and Culture Rodrigo Cacho Casal, Caroline Egan, 2022-05-01 The Routledge Hispanic Studies Companion to Early Modern Spanish Literature and Culture introduces the intellectual and artistic breadth of early modern Spain from a range of disciplinary and critical perspectives Spanning the sixteenth and seventeenth centuries a period traditionally known as the Golden Age the volume examines topics including political and scientific culture literary and artistic innovations and religious and social identities and institutions in transformation The 36 chapters of the volume include both expert overviews of key topics and figures from the period as well as new approaches to understudied questions and materials This invaluable resource will be of interest to advanced students and scholars in Hispanic studies as well as Renaissance and early modern studies more generally Virgil and his Translators Susanna Braund, Zara Martirosova Torlone, 2018-10-04 This is the first volume to offer a critical overview of the long and complicated history of translations of Virgil from the early modern period to the present day transcending traditional studies of single translations or particular national traditions in isolation to offer an insightful comparative perspective The twenty nine essays in the collection cover numerous European languages from English French and German to Greek Irish Italian Norwegian Slovenian and Spanish but also look well beyond Europe to include discussion of Brazilian Chinese Esperanto Russian and Turkish translations of Virgil While the opening two contributions lay down a broad theoretical and comparative framework the majority conduct comparisons within a particular language and combine detailed case studies with in depth contextualization and theoretical background showing how the translations discussed are embedded in their own cultures and historical moments The final two essays are written from the perspective of contemporary translators closing out the volume with a profound assessment not only of the influence exerted by the major Roman poet on later literature but also why translation of a canonical author such as Virgil matters not only as a national and transnational cultural phenomenon but as a personal engagement with a literature of enduring power and relevance **Antiquarianisms** Benjamin Anderson, Felipe Rojas, 2017-05-31 Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises although both existed long before the early modern period and both were and continue to be practiced in places other than Europe Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions but the clear cut distinction between indigenous and colonial archaeologies has obscured the intense and dynamic interaction between these seemingly different endeavours This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas Both regions host robust pre modern antiquarian traditions that have continued to develop during periods of colonialism In both regions moreover colonial encounters have been mediated by the antiquarian practices and preferences of European elites The two regions also exhibit salient differences For example Europeans claimed the antiquities of the eastern Mediterranean as part of their own classical heritage whereas they perceived those of the Americas

as essentially alien even as they attempted to understand them by analogy to the classical world These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross bred antiquarianisms Rather than assuming that interest in antiquity is a human universal this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation

The Invention of the Colonial Americas Byron Ellsworth Hamann, 2022-09-13 The story of Seville's Archive of the Indies reveals how current views of the sixteenth and seventeenth centuries are based on radical historical revisionism in Spain in the late 1700s The Invention of the Colonial Americas is an architectural history and media archaeological study of changing theories and practices of government archives in Enlightenment Spain It centers on an archive created in Seville for storing Spain's pre 1760 documents about the New World To fill this new archive older archives elsewhere in Spain spaces in which records about American history were stored together with records about European history were dismembered The Archive of the Indies thus constructed a scholarly apparatus that made it easier to imagine the history of the Americas as independent from the history of Europe and vice versa In this meticulously researched book Byron Ellsworth Hamann explores how building layouts systems of storage and the arrangement of documents were designed to foster the creation of new knowledge He draws on a rich collection of eighteenth century architectural plans descriptions models document catalogs and surviving buildings to present a literal materially precise account of archives as assemblages of spaces humans and data assemblages that were understood circa 1800 as capable of actively generating scholarly innovation

Cotton Mather's Spanish Lessons Kirsten Silva Gruesz, 2022-07-05 In 1699 Cotton Mather authored the first Spanish language text in the English New World a religious tract aimed at evangelizing readers across the Spanish Americas Kirsten Silva Gruesz uses Mather's text to explore complex overlaps of race ethnicity and language in the early Americas which continue to govern Latina/o/x belonging today

Empire of Eloquence Stuart M. McManus, 2021-04-08 The global reach of the Spanish and Portuguese empires prompted a remarkable flourishing of the classical rhetorical tradition in various parts of the early modern world Empire of Eloquence is the first study to examine this tradition as part of a wider global renaissance in Europe the Americas Asia and Africa with a particular focus on the Iberian world Spanning the sixteenth to the early nineteenth centuries the book argues that the classical rhetorical tradition contributed to the ideological coherence and equilibrium of this early modern Iberian world providing important occasions for persuasion legitimation and eventual and perhaps inevitable confrontation Drawing on archival collections in thirteen countries Stuart M. McManus places these developments in the context of civic religious and institutional rituals attended by the multi ethnic population of the Iberian world and beyond and shows how they influenced public speaking in non European languages such as Konkani and Chinese

Sixteenth-Century English Dictionaries John Considine, 2022 This is the first of three volumes offering a new history of lexicography in and beyond the early modern British Isles This volume focuses on the period from the end of the Middle Ages

to the year 1600 exploring the first printed dictionaries Latin and foreign language dictionaries and specialized English wordlists The Early Modern Production of Missionary Books on Indigenous Languages in New Spain and Peru Zanna Loon, 2025-10-01 How do the social material and spatial processes underlying the making of early modern missionary grammars vocabularies and devotional translations deepen our understanding of their contents The handwritten and printed missionary books produced in the Spanish viceroyalties of New Spain and Peru were key instruments designed to help study Indigenous languages in order to efficiently teach religious doctrine to local communities unfamiliar with European culture and religion This volume considers these missionary books as physical and social objects and illuminates how a variety of factors determines their physical appearance structure and form which in turn shape and guide the interpretation of their contents people involved in its making geographical and social circumstances and conditions of production technologies materials and tools genre and function s of the books and intended readership modes of distribution and readerly responses
