Transnational Common Goods Strategic Constellations Collective Action Problems And Multi Level Provision:

Transnational Common Goods K. Holzinger, 2008-11-24 This book analyzes international financial markets and environmental problems as typical examples of transnational common goods and considers the factors affecting the strategic constellations of countries in common goods provision in particular the strategic effects of multi level governance

Transnational Partnerships M. Beisheim, A. Liese, 2014-02-20 Why are some transnational public private partnerships PPPs highly effective while others are not The contributors compare 21 transnational PPPs that seek to provide collective goods in the field of sustainable development Configurations, Dynamics and Mechanisms of Multilevel Governance

Nathalie Behnke, Jörg Broschek, Jared Sonnicksen, 2019-02-01 This edited volume provides a comprehensive overview of the diverse and multi faceted research on governance in multilevel systems The book features a collection of cutting edge transatlantic contributions covering topics such as federalism decentralization as well as various forms and processes of regionalization and Europeanization While the field of multilevel governance is comparatively young research in the subject has also come of age as considerable theoretical conceptual and empirical advances have been achieved since the first influential works were published in the early noughties The present volume aims to gauge the state of the art in the different research areas as it brings together a selection of original contributions that are united by a variety of configurations dynamics and mechanisms related to governing in multilevel systems **Rethinking Multilevel Governance** Arthur

Benz, 2024-08-06 In this insightful book Arthur Benz introduces a novel analytical approach to comparative research on multilevel governance Confronting the intricate problems of coordinating local regional national and international policies in the face of political polarisation he makes the case for pragmatic sustainable and resilient multilevel governance **Libya**

and the Global Enduring Disorder Jason Pack, 2022-02-15 We no longer inhabit a world governed by international coordination a unified NATO bloc or an American hegemon Traditionally the decline of one empire leads to a restoration in the balance of power via a struggle among rival systems of order Yet this dynamic is surprisingly absent today instead the superpowers have all at times sought to promote what Jason Pack terms the Enduring Disorder He contends that Libya's ongoing conflict more so than the civil wars in Yemen Syria Venezuela or Ukraine constitutes the ideal microcosm in which to identify the salient features of this new era of geopolitics The country's post Qadhafi trajectory has been molded by the stark absence of coherent international diplomacy while Libya's incremental implosion has precipitated cross border contagion further corroding global institutions and international partnership Pack draws on over two decades of research in and on Libya and Syria to highlight the Kafkaesque aspects of today's global affairs He shows how even the threats posed by the Arab Spring and the Benghazi assassination of US Ambassador J Christopher Stevens couldn't occasion a unified Western response Rather they have further undercut global collaboration demonstrating the self reinforcing nature of the progressively collapsing world order *Belief and Religion in Barbarian Europe c. 350-700* Marilyn Dunn, 2013-11-28 This

ground breaking study offers a new paradigm for understanding the beliefs and religions of the Goths Burgundians Sueves Franks and Lombards as they converted from paganism to Christianity between c 350 and c 700 CE Combining history and theology with approaches drawn from the cognitive science of religion *Belief and Religion in Barbarian Europe* uses both written and archaeological evidence to challenge many older ideas Beginning with a re examination of our knowledge about the deities and rituals of their original religions it goes on to question the assumption that the Germanic peoples were merely passive recipients of Christian doctrine arguing that so called Arianism was first developed as an entry level Christianity for the Goths Focusing on individual ethnic groupings in turn it presents a fresh view of the relationship between religion and politics as their rulers attempted to opt for Catholicism In place of familiar debates about post conversion pagan survivals contemporary texts and legislation are analysed to create an innovative cognitive perspective on the ways in which the Church endeavoured to bring the Christian God into people s thoughts and actions The work also includes a survey of a wide range of written and archaeological evidence contrasting traditional conceptions of death afterlife and funerary ritual with Christian doctrine and practice in these areas and exploring some of the techniques developed by the Church for assuaging popular anxieties about Christian burial and the Christian afterlife

The Private Sector and Water Pricing in Efficient Urban Water Management Cecilia Tortajada, Francisco González-Gómez, Asit K. Biswas, Miguel A. García-Rubio, 2016-01-08 This book focuses on participation of the public and private sectors in urban water management and on the role of water pricing It discusses in depth topics such as public choices of urban water service management dynamics of privatization and regulation of water services adoption of water demand instruments impacts of price and non price policies on residential water demand quality of water services lessons from not for profit public private partnerships and critical examinations of models and projections of demands in water utility resource planning in England and Wales Appropriateness of water prices and tariffs in achieving socially desirable outcomes is also analyzed and a global survey of urban water tariffs is approached with a focus on sustainability efficiency and fairness This book was originally published as a special issue of the International Journal of Water Resources Management

A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01

Acclaim for the first edition This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces the collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment

International Sociology Review of Books The Handbook of Globalisation and Environmental Policy is a very important book More than 40 experienced authors including some of the most important international thought leaders of our time have

confronted a crucial question How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability Through close examination of numerous case studies a balanced perspective that takes government business and civil society into account and fresh interdisciplinary thinking about a range of policy tools the Handbook offers a treasure trove of new concepts and new perspectives The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums national governments can in fact increase their capacity to shape their own destiny Lawrence Susskind Massachusetts Institute of Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook s depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science

The Future of Public Water Governance Christopher A. Scott, Bernard de Gouvello, 2024-11-01 The privatization of water supply and wastewater systems together with institutional restructuring of governance through decentralization and the penetration of global firms in local and regional markets have been promoted as solutions to increase economic efficiency and achieve universal water supply and sanitation coverage Yet a significant share of service provision and water resources development remains the responsibility of public authorities The chapters in this book with case evidence from Argentina Chile France the USA and other countries address critical questions that dominate the international agenda on public versus private utilities service provision regulations and resource development This book presents varied perspectives largely complementary but at times contrasting on public and private governance of water Public authority in general is being reasserted over service provision while resource development and investments in infrastructure continue as a mix of public and private initiatives But more important increased oversight and regulation of market based initiatives that until recently were touted as panaceas for water supply and sanitation are increasingly being reconsidered on the basis of social equity

environmental and public health concerns This book was based on the special issue of Water International
