Transport Beyond Oil Policy Choices For A Multimodal Future:

Transport Beyond Oil John L. Renne, Billy Fields, 2013-03-28 Seventy percent of the oil America uses each year goes to transportation That means that the national oil addiction and all its consequences from climate change to disastrous spills to dependence on foreign markets can be greatly reduced by changing the way we move In *Transport Beyond Oil* leading experts in transportation planning development and policy show how to achieve this fundamental shift The authors demonstrate that smarter development and land use decisions paired with better transportation systems can slash energy consumption John Renne calculates how oil can be saved through a future with more transit oriented development Petra Todorovitch examines the promise of high speed rail Peter Newman imagines a future without oil for car dependent cities and regions Additional topics include funding transit freight transport and nonmotorized transportation systems Each chapter provides policy prescriptions and their measurable results *Transport Beyond Oil* delivers practical solutions based on quantitative data This fact based approach offers a new vision of transportation that is both transformational and achievable

A Companion to the Anthropology of Environmental Health Merrill Singer, 2016-05-31 A Companion to the Anthropology of Environmental Health presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world Features the latest ethnographic research from around the world related to the multiple impacts of the environment on health and of societies on their environments Includes contributions from international medical anthropologists conservationists environmental experts public health professionals health clinicians and other social scientists Analyzes the conditions of cultural and social transformation that accompany environmental and ecological impacts in all areas of the world Offers critical perspectives on theoretical and methodological advancements in the anthropology of environmental health along with future directions in the field

Sustainability Principles and Practice Margaret Robertson, 2021-02-09 *Sustainability Principles and Practice* gives an accessible and comprehensive overview of the interdisciplinary field of sustainability The focus is on furnishing solutions and equipping students with both conceptual understanding and technical skills Each chapter explores one aspect of the field first introducing concepts and presenting issues then supplying tools for working toward solutions Elements of sustainability are examined piece by piece and coverage ranges over ecosystems social equity environmental justice food energy product life cycles cities and more Techniques for management and measurement as well as case studies from around the world are provided The 3rd edition includes greater coverage of resilience and systems thinking an update on the Anthropocene as a formal geological epoch the latest research from the IPCC and a greater focus on diversity and social equity together with new details such as sustainable consumption textiles recycling microplastics and net zero concepts The coverage in this edition has been expanded to include issues solutions and new case studies from around the world including Europe Asia and the Global South Chapters include further reading and discussion questions The

book is supported by a companion website with online links annotated bibliography glossary white papers and additional case studies together with projects research problems and group activities all of which focus on real world problem solving of sustainability issues This textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught

Resilient Cities, Second Edition Peter Newman, Timothy Beatley, Heather Boyer, 2017-06 Drawing from research and examples about resilient cities this book looks at new initiatives and innovations cities can implement

Adaptation Urbanism and Resilient Communities Billy Fields, John L. Renne, 2021-05-03 Adaptation Urbanism and Resilient Communities outlines and explains adaptation urbanism as a theoretical framework for understanding and evaluating resilience projects in cities and relates it to pressing contemporary policy issues related to urban climate change mitigation and adaptation Through a series of detailed case studies this book uncovers the promise and tensions of a new wave of resilient communities in Europe Copenhagen Rotterdam and London and the United States New Orleans and South Florida In addition best practice projects in Amsterdam Barcelona Delft Utrecht and Vancouver are examined The authors highlight how these communities are reinventing the role of streets and connecting public spaces in adapting to and mitigating climate change through green blue infrastructure planning maintaining and enhancing sustainable transportation options and struggling to ensure equitable development for all residents The case studies demonstrate that while there are some more universal aspects to encouraging adaptation urbanism there are also important local characteristics that need to be both acknowledged and celebrated to help local communities thrive in the era of climate change The book also provides key policy lessons and a roadmap for future research in adaptation urbanism Advancing resilience policy discourse through multidisciplinary framework this work will be of great interest to students of urban planning geography transportation landscape architecture and environmental studies as well as resilience practitioners around the world

Unsustainable Transport and Transition in China Becky PY Loo, 2018-01-02 This book discusses various transport sustainability issues from the perspective of developing countries exploring key issues problems and potential solutions for improving transport sustainability in China It first reviews the current transport sustainability baselines in the three key dimensions of environmental economic and social sustainability via an international comparison encompassing both developed and developing countries in different world regions Then with a time frame up to 2030 the study groups 100 major Chinese cities according to their baseline conditions projected population and economic growth and common sustainability challenges in passenger transport A systematic attempt is made to discuss the characteristics strengths and weaknesses of various emerging sustainable transport strategies including the metro systems bus rapid transit light rail bicycles and e bicycles electric vehicles and walking Based on the different city clusters identified the study then explores the opportunities and constraints of introducing a range of emerging sustainable transport strategies through both statistical analysis and detailed fieldwork Future directions and challenges are identified based on official

documents onsite observations and interviews with local people The study concludes with thoughts on sustainable transport in smart cities the importance of governance local participation internal and external city movements and towards a holistic sustainable transport plan Unsustainable Transport and Transition in China will be of great interest to scholars interested in carbon emissions climate change environmental policy planning road safety sustainability transportation and urban studies and is relevant to China and other developing countries *Democratic Eco-Socialism as a Real Utopia* Hans A.

Baer,2017-10-01 As global economic and population growth continues to skyrocket increasingly strained resources have made one thing clear the desperate need for an alternative to capitalism In *Democratic Eco Socialism as a Real Utopia* Hans Baer outlines the urgent need to reevaluate historical definitions of socialism commit to social equality and justice and prioritize environmental sustainability Democatic eco socialism as he terms it is a system capable of mobilizing people around the world albeit in different ways to prevent on going human socio economic and environmental degradation and anthropogenic climate change **Unique Urbanity?** Tara Brabazon,2014-11-21 This book investigates small cities cities and towns that are not well known or internationally branded but are facing structural economic and social issues after the Global Financial Crisis They need to invent develop and manage new reasons for their existence The strengths and opportunities are often underplayed when compared to larger cities These small cities do not have the profile of New York London Tokyo or Cairo or second tier cities like San Francisco Manchester Osaka or Alexandria This book traces the current state of the creative industries literature after the GFC but with a specific focus The specific and worsening conditions in third tier cities are logged The social and economic challenges within these regions are great particularly with regard to health and health services education employment social mobility and physical activity This is not a study that merely diagnoses problems but raises strategies for third tier cities to create both a profile and growth The current research field is synthesized to reveal how cities are defined constituted developed and in many cases suffering decline There is an imperative to build relationships with other urban environments The book enters these under discussed locations and reveal the scarred layering of injustice signified by depopulation dis investment economic decline and a reduction in public services for health transportation and education while also developing specific and innovative models for improvement The vista summoned in *Unique Urbanity* is international with strong attention to trans local strategies that offer wide relevance currency and opportunities for policy makers While third tier cities are often hidden marginalized invisible or demeaned *Unique Urbanity* shows that innovation imagination and creativity can emerge in small places Motor Vehicles, the Environment, and the Human Condition Hans A. Baer,2019-10-09 The world now has more than a billion motor vehicles and this number continues to increase as developing countries imitate developed societies in their adoption of the culture of automobility This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises the latter of which are most manifest in anthropogenic climate change to which motor vehicles constitute a major contributor A political

ecological perspective recognizes that motor vehicles perhaps more than any other machine embody the social structural cultural and environmental contradictions of the capitalist world system In addition to highlighting many of the environmental social and health environmental consequences of humanity's increasing reliance on motor vehicles particularly private automobiles this book argues that ultimately we need as a species to move beyond motor vehicles as much as possible but that such an effort will have be part and parcel of creating an alternative world system based on social justice democratic processes environmental sustainability and a safe climate one termed democratic eco socialism *The Affordable Housing Reader* Elizabeth Mueller,J. Rosie Tighe,2022-07-14 This second edition of *The Affordable Housing Reader* provides context for current discussions surrounding housing policy emphasizing the values and assumptions underlying debates over strategies for ameliorating housing problems experienced by low income residents and communities of color The authors highlighted in this updated volume address themes central to housing as an area of social policy and to understanding its particular meaning in the United States These include the long history of racial exclusion and the role that public policy has played in racializing access to decent housing and well serviced neighborhoods the tension between the economic and social goals of housing policy and the role that housing plays in various aspects of the lives of low and moderate income residents Scholarship and the COVID 19 pandemic are raising awareness of the link between access to adequate housing and other rights and opportunities This timely reader focuses attention on the results of past efforts and on the urgency of reframing the conversation It is both an exciting time to teach students about the evolution of United States housing policy and a challenging time to discuss what policymakers or practitioners can do to effect positive change This reader is aimed at students professors researchers and professionals of housing policy public policy and city planning
