Graffiti and Rock Inscriptions from Ancient Egypt Khaled Hassan,Chloe Ragazzoli,Chiara Salvador,2023-12-31 Graffiti dipinti rock inscriptions and other additions to walls and rocks are integral to the landscape and writing practices of ancient Egypt This book focuses on the margins of traditional ancient Egyptian epigraphic corpora It aims to provide an all encompassing view of graffiti practices and corpora in ancient Egypt ranging from predynastic rock art in the Eastern Desert to hieratic inscriptions in Middle Egyptian tombs and demotic signatures in Karnak temple A range of specialists present primary data from three different environments deserts tombs and temples following common lines of inquiry that aim to look beyond their textual or iconographic content and address graffiti s agency more closely Accordingly this book investigates the interplay between secondary inscriptions and images the space in which they were embedded and the audiences for whom they were intended Despite the diversity inherent in the nature of graffiti common paths and shared threads of discussion emerge once these inscriptions are considered as material objects and socio cultural practices

Unlocking the Love-Lock Ceri Houlbrook, 2021-01-13 Explores the worldwide popularity of the love lock as a ritual token of love and commitment by considering its history symbolism and heritage This is an eminently enjoyable and thorough investigation of a popular phenomenon through the lens of heritage and folk tradition Sara De Nardi Western Sydney University A padlock is a mundane object designed to fulfil a specific and secular purpose A contemporary custom has given padlocks new significance This custom is love locking where padlocks are engraved with names and attached to bridges in declaration of romantic commitment This custom became popular in the 2000s and its dissemination was rapid geographically unbound and highly divisive with love locks emerging in locations as diverse as Paris and Taiwan New York and Seoul Melbourne and Moscow From the introduction I was distractedly perusing the photo frame aisle my eyes skimming the generically sentimental stock pictures of happy families smiling at the camera pretty landscapes cute pets and couples walking hand in hand when I came across one that jumped out at me I recognised the image instantly as a photograph of love locks the padlocks that had been appearing en masse on bridges and other public structures on a global scale since the early 2000s And having been researching the custom known as lovelocking for about five years at that point it was with a peculiar sense of pride that I realised love locks had accomplished the status of a stock image

Graffiti and Street Art Konstantinos Avramidis, Myrto Tsilimpounidi, 2016-12-08 Graffiti and street art images are ubiquitous and they enjoy a very special place in collective imaginary due to their ambiguous nature Sometimes enigmatic in meaning often stylistically crude and aesthetically aggressive yet always visually arresting they fill our field of vision with texts and images that no one can escape As they take place on surfaces and travel through various channels they provide viewers an entry point to the subtext of the cities we live in while questioning how we read write and represent them This book is structured around these three distinct albeit by definition interwoven key frames The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear shed light on previously unexamined aspects of these practices and introduce innovative methodologies regarding the treatment of these images Throughout the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings In this

book the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts All chapters are original and come from experts in various fields such as Architecture Urban Studies Sociology Criminology Anthropology and Visual Cultures as well as scholars that transcend traditional disciplinary frameworks This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter It is also accessible to a non academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced understood and envisioned

Archaeology and Photography Lesley McFadyen, Dan Hicks, 2020-08-05 Does a photograph freeze a moment of time What does it mean to treat a photographic image as an artefact In the visual culture of the 21st century do new digital and social forms change the status of photography as archival or objective or are they revealing something more fundamental about photography's longstanding relationships with time and knowledge Archaeology and Photography imagines a new kind of Visual Archaeology that tackles these questions The book reassesses the central place of Photography as an archaeological method and re-wires our cross disciplinary conceptions of time objectivity and archives from the History of Art to the History of Science Through twelve new wide ranging and challenging studies from an emerging generation of archaeological thinkers Archaeology and Photography introduces new approaches to historical photographs in museums and to contemporary photographic practice in the field The book re-frames the relationship between Photography and Archaeology past and present as more than a metaphor or an analogy but a shared vision Archaeology and Photography calls for a change in how we think about photography and time It argues that new archaeological accounts of duration and presence can replace older conceptions of the photograph as a snapshot or remnant received in the present The book challenges us to imagine Photography like Archaeology not as a representation of the past and the reception of traces in the present but as an ongoing transformation of objectivity and archive Archaeology and Photography will prove indispensable to students researchers and practitioners in History Photography Art Archaeology Anthropology Science and Technology Studies and Museum and Heritage Studies

The Routledge Handbook of Archaeology and the Media in the 21st Century Lorna-Jane Richardson, Andrew Reinhard, Nicole Smith, 2024-06-20 The Routledge Handbook of Archaeology and the Media in the 21st Century presents diverse international perspectives on what it means to be an archaeologist and to conduct archaeological research in the age of digital and mobile media This volume analyses the present day use of new and old media by professional and academic archaeology for leisure academic study and or public engagement and attempts to provide a broad survey of the use of media in a wider global archaeological context It features work on traditional paper media radio podcasting film television contemporary art photography video games mobile technology 3D image capture digitization and social media Themes explored include archaeology and traditional media archaeology in a digital age archaeology in a post truth era and the future of archaeology

Such comprehensive coverage has not been seen before and the focus on 21st century concerns and media consumption practices provides an innovative and original approach. The Routledge Handbook of Archaeology and the Media in the 21st Century updates the interdisciplinary field of media studies in archaeology and will appeal to students and researchers in multiple fields including contemporary public digital and media archaeology and heritage studies and management. Television and film producers, writers and presenters of cultural heritage will also benefit from the many entanglements shared here between archaeology and the contemporary media landscape.

Learning Archaeology A. Katherine Patton, Danielle A. Macdonald, Michael Chazan, 2025-10-17. Learning Archaeology is designed for undergraduate archaeology students helping them develop interpretive skills in the classroom through problem-oriented active learning exercises. This book brings together case studies drawn from real archaeological research so students can understand and wrestle with how archaeology is practiced, the kinds of questions that can be addressed with archaeological data and their limits, and the often-contested place of the discipline in the modern world. Experts working across the globe and on a variety of topics have written chapters addressing critical archaeological issues or questions using data and examples from their own research projects. Several chapters are co-authored by experienced practitioners working outside of the academy in archaeology and heritage-related fields including Tribal or First Nations members. Importantly, each author or group of authors situates their archaeological problem within the social and political context of their practice. With ethical and socio-political considerations woven through each chapter, the book is structured into three sections: Excavation, Analytical Methods, and Archaeology in the Contemporary World, and provides both a comprehensive view of archaeological method and an understanding of the role that archaeological knowledge has in contemporary society. Learning Archaeology is for undergraduate archaeology students and suitable for use in introductory courses in archaeology.
