1. What is biological evolution? **Change in gene frequency in a population over time. It has shaped changes in organisms from their earliest beginnings to now.**
2. Compare microevolution vs. macroevolution. How are they different? **Microevolution is evolution of a single population (caused by genetic variability), whereas macroevolution is the evolution of an entire species (because of the environment).**
3. What is a common ancestor? **An ancestor that is shared by two similar species.**
4. Biological evolution occurs through natural selection. What is natural selection? **Survival of the fittest – whoever is most fit to survive in the environment will live and make more babies.**
5. What are the four principles of natural selection? **Overproduction of offspring, variation, adaptation, and descent with modification.**
6. How does overproduction of offspring influenced by natural selection? **The more offspring an organism has, the more likely some will survive to reproduce.**
