TOF Range-Imaging Cameras Fabio Remondino, David Stoppa, 2013-04-09 Today the cost of solid state two dimensional imagers has dramatically dropped introducing low cost systems on the market suitable for a variety of applications including both industrial and consumer products However these systems can capture only a two dimensional projection 2D or intensity map of the scene under observation losing a variable of paramount importance i.e. the arrival time of the impinging photons Time Of Flight TOF Range Imaging TOF is an emerging sensor technology able to deliver at the same time depth and intensity maps of the scene under observation Featuring different sensor resolutions RIM cameras serve a wide community with a lot of applications like monitoring architecture life sciences robotics etc This book will bring together experts from the sensor and metrology side in order to collect the state of art researchers in these fields working with RIM cameras All the aspects in the acquisition and processing chain will be addressed from recent updates concerning the photo detectors to the analysis of the calibration techniques giving also a perspective onto new applications domains

Time-of-Flight Cameras Miles Hansard, Seungkyu Lee, Ouk Choi, Radu Patrice Horaud, 2012-11-06 Time of flight TOF cameras provide a depth value at each pixel from which the 3D structure of the scene can be estimated This new type of active sensor makes it possible to go beyond traditional 2D image processing directly to depth based and 3D scene processing Many computer vision and graphics applications can benefit from TOF data including 3D reconstruction activity and gesture recognition motion capture and face detection It is already possible to use multiple TOF cameras in order to increase the scene coverage and to combine the depth data with images from several colour cameras Mixed TOF and colour systems can be used for computational photography including full 3D scene modelling as well as for illumination and depth of field manipulations This work is a technical introduction to TOF sensors from architectural and design issues to selected image processing and computer vision methods
