Tomorrows Cures Today How To Reform The Health Research System:

Tomorrow's Cures Today? Donald R Forsdyke, 2003-09-02 Discussing the laws in the current research funding decision process the author suggests ways to improve future funding of health research systems Chapters recount ways of raising funds the tragic way authorities improperly introduced diphtheria immunization consideration of how the peer review system evolved in response to massive infusion of funds in the nineteen forties and the status quo generating a climate conducive to ethics violations among others This fascinating work will be an invaluable tool to researchers health care workers members of government agencies and those in charitable organizations that support health research as well as to anyone interested in current trends in this area including patients *VA research : investing today to guide tomorrow's treatment : hearing ,*

Origin of Species Revisited Donald R. Forsdyke, 2001-10-09 The trail led first to Joseph Hooker and Thomas Huxley who had been both the theory's strongest supporters and its most penetrating critics and eventually to Darwin's young research associate the Victorian Georges Romanes and to the Victorian Edwardian William Bateson Although these men were well known their resolution of the origin of species paradox has either been ignored Romanes or ignored and reviled Bateson Four years after Darwin's death Romanes published a theory of the origin of species by means of physiological selection that resolved the inconsistencies in Darwin's theory and introduced the idea of a peculiarity of the reproductive system that allowed selective fertility between physiological complements Forsdyke argues that the chemical basis of the origin of species by physiological selection is actually the species dependent component of the base composition of DNA showing that Romanes thus anticipated modern biochemistry Using this new perspective Forsdyke considers some of the outstanding problems in biology and medicine including the question of how self is distinguished from not self by members of different species Finally he examines the political and ideological forces that led to Romanes contribution to evolutionary biology which has remained unappreciated until now *Oh Omnivore! The Path Of An Eclectic Theoretical Biologist* Richard Gordon, 2025-04-02 Richard Gordon is a theoretical biologist who has led a multifaceted career with research spanning various fields and being a professor in departments as varied as Radiology and Botany His eclectic scientific pursuits and prolific writing have resulted in over 200 peer reviewed publications as well as many edited books and special issues This is his personal memoir It is based on a review of all his publications from Gordon's early years to the present He recounts the collaborations most importantly including the development of the nonlinear Algebraic Reconstruction Technique for image reconstruction his most cited work The ART algorithm today forms the basis of technologies that have dramatically improved progress from both basic science and in medicine such as computed tomography to 3D imaging of the sun's corona from satellites launched around the sun The memoir offers a unique blend of scientific storytelling personal reflection and humanitarian endeavor providing a fascinating glimpse into the life and work of a theoretical biologist with a remarkable range of interests and accomplishments The overarching theme is how does one survive as a generalist in an academic world

of specialists The key seems to have been to have many collaborators both in and outside the academic world and diverse grant sources The result has been an enjoyable and highly productive career exploring many aspects of the world from amusing games to profound scientific and philosophical questions to potentially significant contributions to humanity By following his interests Gordon shows it is still possible to be a polymath in a fractionated world Along the way the author suggests many outstanding problems he s encountered that readers may want to tackle themselves BMJ ,2001

Canadian Science, Technology, and Innovation Policy G. Bruce Doern,David Castle,Peter W.B. Phillips,2016-06-01
An extensive and in depth account and explanation of Canada s changing policies for science technology and innovation
