Das magische Buch 3 - Voodoo Inez Gavilanes, Anne-Marie Donslund, 2015-07-17 Die Sommerferien sind vorbei und Cecilies Leben ist ein einziger Trummerhaufen Sie hat sich mit Julie und Helena zerstritten

und von Kasper hat sie seit der Aktion im Freibad auch nichts mehr gehört. Doch zum Glück kann sie sich mit dem neuen Mädchen in der Klasse anfreunden. Anna lebt mit ihrer Schwester in einer Gartenkolonie trägt Lederjacken und schminkt sich die Augen möglichst schwarz. Als sich zudem herausstellt, dass Anna so einiges von Magie weiß, beschließt Cecilie ihr das Magische Buch zu zeigen. Anna findet Cecilie sollte sich auf jeden Fall an Kasper richten, aber ob das wirklich eine so gute Idee ist. Das Magische Buch sagt doch, wenn Magie gebraucht wird, um anderen zu schaden, hat das für den Anwender schlimme Konsequenzen. Eine Warnung, die Cecilie vielleicht hätte ernst nehmen sollen, bevor sie die erste Nadel in ihre Kasper-Puppe steckte. Aus dem Deutschen übersetzt von Jasmin Glauser. Transactional Lean: Preparing for the Digitalization Era Bruno G. Rüttimann, 2019-06-18. This book goes beyond searching for Muda by Gemba; the aim is to industrialize the office environment in view of the new digitalization challenge by applying the same principles of Lean industry. Whereas the basic process theory remains valid, the Lean tools have to be adapted and transposed to the office characteristics, where not machines but employees are at the center of the transactions. Here a new, already successfully applied, integrated industry-derived and systematic approach is presented. It will not only boost office effectiveness and productivity as well as shortening lead time of office routines far beyond simple Muda elimination, but it will also prepare the processes in view of the upcoming digitalization era.

Digital Transformation of Business Everlin Piccinini, 2016-08-26. History of corporations is replete with stories of fundamental organizational change in the face of breakthroughs in technology and significant economic changes. Yet pervasive digitalization, i.e. a socio-technical process whereby digital technology capabilities are embedded into everyday artifacts and life-altering everyday experiences and interactions, brings about substantial changes in environmental conditions not seen before. The fast-paced, unbounded, ongoing and potentially disruptive nature of change in today's digitized world is fueled by the generativity of digital innovation, forcing incumbents across industries to transform and adapt. This cumulative dissertation presents five studies that provide a comprehensive understanding on the emerging phenomenon of digital transformation of business. With the help of primary data collected from more than 40 industry experts as well as secondary data, it aimed at explaining through a configurational perspective how, in certain contextual conditions, a combination of particular mechanisms may lead

automotive manufacturing organizations to embark on a sustainable digital transformation of their business Overall the findings derive a holistic view of the investigated phenomenon indicating that it stems from socio technical developments in the macro meso and micro levels of business fostering incumbents to build new mechanisms that activate digital transformation capabilities to rapidly respond to such socio technical developments fundamentally altering their traditional business logics Nevertheless research on the phenomenon of digital transformation is in its infancy in both information systems and organizational science research therefore more in depth empirical accounts are still needed
