Mopokes and Mirages Rex Ellis, 2013. Mopokes and Mirages both part of the great Australian Folklore but neither having much substance. No such bird as a mopoke. See the Introduction to this book and a bit hard to get your hand or mind around a mirage. Mopokes and Mirages is Rex Ellis eighth book but unlike the title it is full of substance. Once started it is like taking the lid off a Pandora's box the stories all true and accounts that spill out are as varied as the rich landscapes and wildlife of the Australian continent itself. No subject is sacred to this South Australian Bushie from how he acquired the iconic Birdsville Pub to how he acquired or yarded up his wife Patti. More of his company's great desert camel expeditions his legendary inland boat safaris to Lake Eyre and other places and a long chapter on four wheel drive vehicles he has owned over his forty five years as an outback guide. There are his regular chapters Bureaucracy and the Shinybum Brigade and Along the rocky road of life. Throughout his love and knowledge of this country flora and fauna particularly birds is evident as is his obvious concern for the health of the Australian environment. Last but not least is his great passion for his paddle wheeler the sixty foot sternwheeler Dromedary. Of particular interest is his ongoing journey up the Darling River getting the Dromedary to places where no large vessel has been for nearly a hundred years. A great read for lovers of the Land of Oz.

Mechanical Ventilation from Pathophysiology to Clinical Evidence Giacomo Bellani, 2022-03-16. This book aims to give a comprehensive overview of the current challenges and solution posed to the health care professionals who need to use mechanical ventilation to treat their patients. Mechanical ventilation is a cornerstone of the treatment of critically ill patients as also dramatically underlined by the recent COVID 19 pandemic. The topic is not simple to approach since it requires integration of multiple data which in turn result from complex interplays between patient's condition and ventilatory settings. While technological development empowered advanced monitoring and decision support these also increase the burden of data on the practitioners. Furthermore considering that sometimes mechanical ventilation is seen under two apparently opposite approaches physiology vs protocols the book aims to reconcile these two aspects. And this has been done by each author following the above trajectory in their chapters. The exposure of the topic begins from the pathophysiology i.e. the physiology of the disease so that the reader can better understand the concept and rationale of any given approach. At the same time any rationale or hypothesis for as much as supported by physiology must hold at the proof of clinical research and evidence which is summarized in each chapter. In summary the purpose is that the readers understand not only which is the best clinical practice to adopt but also why and which mechanisms this is based upon and how to approach a novel issue they might encounter. The book addressed to physicians nurses and respiratory therapist features chapters on novel or hot topics like obviously COVID 19 ECMO but also MV in low resource
