Description

Hauler A30 consists of two main parts, the tractor unit and the trailer unit. The two units are joined through the hitch which allows movement around a vertical axis for steering, the steering joint, and around an horizontal axis, the frame joint, for independent movement of the two vehicle parts.

The tractor unit consists of a six-cylinder diesel engine, transmission and dropbox as well as a drive axle. The cab is rubber mounted in the frame. The drive axle is spring-mounted relative to the frame.

The trailer unit consists of frame, tippable dump body and front and rear drive axles, which are connected through a bogie suspension.

The hauler has a permanent 4-wheel drive and 6-wheel drive which can be engaged and disengaged. It has a longitudinal differential lock in the dropbox and differential locks in the drive axles.
