## POWER AND EFFICIENCY

The Volvo D7E290 is a 7.1-litre, in-line six-cylinder diesel engine with a power output of 290 bhp, equipped with a turbocharger and intercooler. The engine meets the EU's exhaust emission standards according to Euro 5 and EEV.

### 290 bhp, 7.1-litre diesel engine

The Volvo D7E engine is equipped with updated systems for fuel injection and the latest-generation engine management system, EMS. A particularly wide torque range contributes to excellent driveability.

Electronic engine management and extremely precise common rail fuel injection promote accurately controlled fuel injection. This together with high boost pressure from the turbocharger, high injection pressure and optimisation of the fuel injector nozzles in the combustion chamber leads to efficient combustion.

The efficient combustion process together with after-

treatment of the exhaust gases using SCR (Selective Catalytic Reduction) technology means this engine is environmentally optimised, approved according to the Euro 5 emission norms. What is more, emission levels are below the limit for EEV (Enhanced Environmentally friendly Vehicle) which imposes even higher demands, for instance requiring even lower levels of particulate emissions.

The engine is very smooth and quiet owing to its design. The timing mechanism is surrounded by a steel panel with a cast iron cover. The Volvo D7E engine has long service intervals, which contributes to low maintenance costs.

The D7E engine has long service intervals, which contributes to low maintenance costs.

Efficient combustion is achieved through measures such as high boost pressure from the turbocharger.
