Words And Buildings A Vocabulary Of Modern Architecture

Yeoryia Manolopoulou

Words And Buildings A Vocabulary Of Modern Architecture:

Words and Buildings Adrian Forty, 2004 Available again a wholly original study of the complex relationship between architecture and language that has changed and enriched the way we think and talk about architecture The words we use when we talk and write about architecture describe more than just bricks and mortar they direct the ways we think of and live with buildings This groundbreaking book is the first thorough examination of the complex relationship between architecture and language as intricate social practices Six rigorously argued chapters investigate the language of modernism language and drawing masculine and feminine architecture language metaphors science in architecture and the social properties of architecture There follows a vocabulary of key words such as Character Form History and Space locating each words modern meaning within an historical and theoretical framework and setting out clearly its development and relevance for architects historians philosophers critics and the users of the buildings themselves Architects should be made to read *Words and Buildings* Architecture Today Unusually clear and accessible Students of all kinds will love this book The Architectural Review A forceful clear and sophisticated exposition of the role of conceptual thought in architectural discourse The Architects Journal *Words and Buildings* Adrian Forty, 2000 **Words and Buildings** Adrian Forty, 2000

Designing Retail Experience in the 21st Century D.J. Huppertz, 2025-04-03 Covering 2001 to today *Designing Retail Experience in the 21st Century* presents readers with a critical cross disciplinary perspective on retail design bringing together scholarship from design architecture branding cultural studies and social studies Our retail experience has changed profoundly over the past two decades largely due to the impact of digital technologies While the rise of smartphones and online commerce threatened to displace bricks and mortar stores physical shopping has survived and in some cases thrived Today the most successful brands design experiences that engage customers both within the physical store and in the digital realm In this book D J Huppertz analyses how corporations design these experiences how we interact with them and how they align with broader social cultural and economic changes Eight case studies reveal how some of the largest global retail chains including Apple Amazon Nike Zara IKEA and LEGO and smaller chains such as Aesop and Gentle Monster utilize design to create engaging experiences Unlike in the past such corporations consider design in a continuum that extends from architecture and interiors to product and service design and from website and digital interactions to social media At the intersection of design and cultural studies this book provides a critical survey and understanding of design and retail experience in the 21st century *Alvar Aalto and the Future of Architecture* Robert Cody, Angela Amoia, 2022-09-09 In the contemporary practice of architecture digital design and fabrication are emergent technologies in transforming how architects present a design and form a material strategy that is responsible equitable sustainable resilient and forward looking This book exposes dialogue between history theory design construction technology and sensory experience by means of digital simulations that enhance the assessment and values of our material choices It offers a critical look to the past to

inspire the future This new edition looks to Alvar Aalto as the primary protagonist for channeling discussions related to these topics Architects like ALA Shigeru Ban 3XN Peter Zumthor and others also play the role of contemporary guides in this review The work of Aalto and selected contemporary architects along with computer modeling software showcase the importance of comprehensive design Organized by the five Ts of contemporary architectural discourse Typology Topology Tectonics Technic Thermodynamics each chapter is used to connect history through Aalto and develop conversations concerning historical and contemporary models digital simulations ecological and passive active material concerns construction and fabrications and healthy sensorial environments Written for students and academics this book bridges knowledge from academia into practice and vice versa to help architects become better stewards of the environment make healthier and more accountable buildings and find ways to introduce policy to make technology a critical component in thinking about and making architecture

Reflections on Camps – Space, Agency, Materiality Antje Senarclens de Grancy, Heidrun Zettelbauer, 2019-06-17 Camps as a global and ubiquitous mass phenomenon of the present and a flexible isolation tool for against specific socially politically or ethnically defined groups are at the centre of current policies and societal debates In the present volume the authors explore camps as cultural spaces in a broad sense and deal with their complex dimensions as sites of the Modern They examine camp spaces and their social configurations physical architectural qualities symbolic functions as well as cultural representations in an intent to define the inscribed ambivalences inconsistencies and paradoxes of the phenomenon Positioned within different disciplinary contexts Contemporary History Visual Studies Architectural History Refugee and Gender Studies the assembled articles present a wide range of understandings and approaches to space materiality and the relations between governance and agency The contributors stress the entanglement of social structures cultural discourse institutionalisation individual perception and appropriation They show how the issue of camps can serve as cross sectional matter for researchers in different fields in Cultural Theory and Contemporary History

The Production of Hospice Space Sarah McGann, 2016-03-03 Challenging the widely held notion of a hospice as a building or a place this book argues that it should instead be a philosophy of care It proposes that the positive and negative impact that space can have in the pursuit of an ideal such as hospice care has previously been underestimated Whether it be a purpose built hospice part of a hospital a nursing home or within the home a hospice is anchored by space and spatial practices and these spatial practices are critical for a holistic approach to dying with dignity Such spatial practices are understood as part of a broad architectural social conceptual and theoretical process By linking health social and architectural theory and establishing conceptual principles this book defines hospice as a philosophy that is underpinned by space and spatial practice In putting forward the notion of hospice space removed from the bounds of a specific building type it suggests that hospice philosophy could and should be available within any setting of choice where the spatial practices support that philosophy be it home nursing home hospice or hospice friendly hospitals

Architectures

of Chance Yeoryia Manolopoulou, 2017-03-02 Architectural discourse and practice are dominated by a false dichotomy between design and chance and governed by the belief that the architect's role is to defend against the indeterminate. In *Architectures of Chance* Yeoryia Manolopoulou challenges this position, arguing for the need to develop a more creative understanding of chance as aesthetic experience and critical method and as a design practice in its own right. Examining the role of experimental chance across film, psychoanalysis, philosophy, fine art, and performance, this is the first book to comprehensively discuss the idea of chance in architecture and bring a rich array of innovative practices of chance to the attention of architects. Wide-ranging and thorough, a symbiotic interplay of drawing and text, *Architectures of Chance* makes illuminating reading for those interested in the process and experience of design and the poetics and ethics of chance and space in the overlapping fields of architecture and the aleatoric arts. *Architectural and Urban Reflections after Deleuze and Guattari* Constantin V. Boundas, Vana Tentokali, 2017-12-15 The post-humanist movement, which currently traverses various disciplines in the arts and humanities as well as the role that the thought of Deleuze and Guattari has had in the course of this movement, has given rise to new practices in architecture and urban theory. This interdisciplinary volume brings together architects, urban designers, and planners and asks them to reflect and report on the built place and the city to come in the wake of Deleuze and Guattari. *The Handbook of Contemporary Indigenous Architecture* Elizabeth Grant, Kelly Greenop, Albert L. Refiti, Daniel J. Glenn, 2018-06-26 This Handbook provides the first comprehensive international overview of significant contemporary Indigenous architecture practice and discourse, showcasing established and emerging Indigenous authors and practitioners from Australia, Aotearoa New Zealand, the Pacific Islands, Canada, USA, and other countries. It captures the breadth and depth of contemporary work in the field, establishes the historical and present context of the work, and highlights important future directions for research and practice. The topics covered include Indigenous placemaking, identity, cultural regeneration, and Indigenous knowledges. The book brings together eminent and emerging scholars and practitioners to discuss and compare major projects and design approaches to reflect on the main issues and debates while enhancing theoretical understandings of contemporary Indigenous architecture. The book is an indispensable resource for scholars, students, policy makers, and other professionals seeking to understand the ways in which Indigenous people have built tradition or aspire to translate their cultures into the built environment. It is also an essential reference for academics and practitioners working in the field of the built environment who need up-to-date knowledge of current practices and discourse on Indigenous peoples and their architecture.
