Tobacco Or Health Physiological And Social Damages Caused By Tobacco Smoking:

Tobacco or Health? Knut-Olaf Haustein, 2013-03-14 Science tends to generalize and generalizations mean simplifications And generalizations are also more satisfying to the mind than details Of course details and generalizations must be in proper balance Generalizations can be reached only from details while it is the generalization which gives value and interest to the detail A Szent Gyorgy Science 1964 The first edition of this book published in German as Tabak abh ngigkeit in 2001 was prompted by the fact that no single volume was available in Germany or elsewhere summarising the adverse repercussions of cigarette smoking on human health As far as my own research was able to ascertain the last comprehensive work dealing with this subject was written in Germany by the Dresden internist F Lickint whose Tabak und Organismus was published in 1939 by the Hippokrates Verlag All subsequent monographs in this field have tended to focus on detailed aspects and there has been no shortage of publications on subjects such as how smokers can quit smoking healthy eating for smokers etc Friends and colleagues abroad have urged me to prepare an English language version of Tabakabh ngigkeit In gladly complying with this suggestion I have intentionally prepared an updated and slightly enlarged new edition taking account of the rapidly proliferating literature on the subject up to the start of 2002 The harmful sequelae of smoking are played down by politicians in many industrialised countries including Germany

Tobacco or Health? Knut-Olaf Haustein, David Groneberg, 2010-05-03 This book comprehensively summarizes the adverse effects of tobacco smoking on human health The current second edition has integrated a large set of new data that have been published in numerous scientific studies and meta analyses over the past few years Unfortunately the harmful sequelae of tobacco smoking are played down by the industry and politicians in many industrialized countries However about 800 000 people year in the EU die from the immediate consequences of smoking The particularly insidious feature of tobacco consumption is that smoking attributable harmful effects on health do not generally become apparent until three or four decades after smoking initiation Although some positive changes in the legislative handling of tobacco have appeared in the past five years we still need to form a pact sealed by politicians the medical professionals teachers and the media to target the problem across nations In this respect a minority of countries including the US and the UK have given positive examples There are four areas that need to be improved in future 1 strict bans on tobacco advertisement on a global level 2 better measures to protect against side stream passive smoke exposure 3 establishment of prevention programs especially for children and 4 treatment of tobacco addiction
