Tomato Container Gardening 7 Easy Steps To Healthy Harvests From Small Spaces:

Shade Tolerant Tomato Varieties: 28 varieties, 7 tips and motivation for growing in the shade Daniel

Keleman,2023-10-01 I've got a clear and intense memory from a couple of decades ago I am about 6 years old back in Transylvania in the village of my grandparents On a sunny morning I am seeking ways to the backyard where they had an apiary and they were also growing all sorts of vegetables and fruits In this memory I finally find my path I tear off a huge ripen tomato and my nearly infinite joyride starts as I push my face into it It smells so delicious as nothing else I feel like in paradise and I chew that delicious thing until I finish Without a thought then I am already craving the next one But a couple of minutes later the idyllic moment dissipates as the bees begin to wake up and start their daily routine The situation is getting hotter and hotter thousands of little flying animals want to catch just me so I realize it's time to go back to my grandparents house Probably this short dream like memory is my first anchor to tomatoes The summer vibes the taste and the smell of that tomato and the idea of how I secretly embraced it all led me to the recognition that I want to revive that moment I must admit that the straightest way to do that is to plant and grow tomatoes in whatever circumstances Now I am in the present again and it happened for years repeatedly and I do it with greater and greater success and joy By the way did you know that in Hungarian we call the tomato and paradise with the same exact word paradicsom IPA p r d i t o m What a coincidence and how well they fit In fact the Hungarian word tomato is abbreviated from the phrase apple of the paradise The plant's apple name is still preserved by its Italian name pomodoro i.e. golden apple Tomato in Spanish is tomate a word of Aztec origin the Spanish conquistadors abbreviated the original Aztec name xitomatl of the fruit brought from America This word then entered many European languages for example French and German tomate English tomato The circumstances of the present They are great but not so great as they were at that time in contrast to the huge fields of the Transylvanian countryside we live now next to Budapest the capital of Hungary This area is more densely populated and our garden is tinier and shadier However I figured out how to grow tomatoes in this new environment and I also found the types of tomatoes that are OK with the shadows And this is the reason I wrote this little book to motivate you by sharing my experiences and maybe providing a bit of guidance To show you that even in not the most optimal parameters tomatoes can be grown My goal is not to cover all the aspects of tomato growing so many tried that already and there is great literature and I will recommend some of the bests of that at the end of this book The goal of this book is to motivate you to grow tomatoes in a suboptimal shady environment to provide hacks to grow tomatoes in shady and little places and to recommend the best tomatoes to grow in shade This book is definitely for tomato lovers who do not have the best environment but still want to try tomato growing and want to have success in the shadows
