Financial Structures and Regulation: A Comparison of Crises in the UK, USA and Italy A. Roselli, 2011-11-08 A survey of past financial crises starting with the great banking collapses of the interwar period The current turmoil has prompted a number of questions regarding both its origins and ways to avoid its repetition The historical background and the evolving institutional framework of banking and financial systems are at the center of this book , *Too Big to Fail Or Too Big to Save?* United States. Congress. Joint Economic Committee, 2009

Reforming U.S. Financial Markets Randall S. Kroszner, Robert J. Shiller, 2013-02-08 Two top economists outline distinctive approaches to post crisis financial reform Over the last few years the financial sector has experienced its worst crisis since the 1930s The collapse of major firms the decline in asset values the interruption of credit flows the loss of confidence in firms and credit market instruments the intervention by governments and central banks all were extraordinary in scale and scope In this book leading economists Randall Kroszner and Robert Shiller discuss what the United States should do to prevent another such financial meltdown Their discussion goes beyond the nuts and bolts of legislative and regulatory fixes to consider fundamental changes in our financial arrangements Kroszner and Shiller offer two distinctive approaches to financial reform with Kroszner providing a systematic analysis of regulatory gaps and Shiller addressing the broader concerns of democratizing and humanizing finance After brief discussions by four commentators Benjamin M Friedman George G Kaufman Robert C Pozen and Hal S Scott Kroszner and Shiller each offer a response to the other s proposals creating a fruitful dialogue between two major figures in the field

The Future of Financial Regulation Johan A. Lybeck, 2016-02-11 A number of changes have been made to the supervision and regulation of banks as a result of the recent financial meltdown Some are for the better such as the Basel III rules for increasing the quality and quantity of capital in banks but legal changes on both

sides of the Atlantic now make it much more difficult to resolve failing banks by means of taxpayer funded bail outs and could hinder bank resolution in future financial crises In this book Johan A Lybeck uses case studies from Europe and the United States to examine and grade a number of bank resolutions in the last financial crisis and establish which were successful which failed and why Using in depth analysis of recent legislation he explains how a bank resolution can be successful and emphasizes the need for taxpayer funded bail outs to create a viable banking system that will promote economic and financial stability

A Global History of the Financial Crash of 2007-10 Johan A. Lybeck, 2011-10-13 We have just experienced the worst financial crash the world has seen since the Great Depression of the 1930s While real economies in general did not crash as they did in the 1930s the financial parts of the economy certainly did or at least came very close to doing so Hundreds of banks in the United States and Europe have been closed by their supervisory authorities forcibly merged with stronger partners nationalized or recapitalized with the tax payers money Banks and insurance companies had by mid 2010 already written off some 2000 billion dollars in credit write downs on loans and securities In this book Johan Lybeck draws on his experience as both an academic economist and a professional banker to present a detailed yet non technical analysis of the crash He describes how the crisis began in early 2007 explains why it happened and shows how it compares to earlier financial crises

The Chinese Cornerstone of Modern Banking Frederic Delano Grant, Jr., 2014-09-25 Modern bank insurance is traced to its roots in The Chinese Cornerstone of Modern Banking The Canton Guaranty System and the Origins of Bank Deposit Insurance 1780 1933 Frederic Delano Grant Jr provides new understandings of the Canton System collective responsibility for debt at Canton and the history of deposit insurance The Canton Guaranty System inspired radical reform in New York in 1829 the ancestor of all modern deposit insurance Yet it was never the success imagined and soon failed In the Opium War the Chinese government as implicit guarantor was forced to pay its debts in full on 23 July 1843 The afflictions of the Chinese system including moral hazard too big to fail and unenforced laws remain familiar today

The Handbook of the Political Economy of Financial Crises Martin H. Wolfson, Gerald A. Epstein, 2013-01-07

The Great Financial Crisis that began in 2007 reminds us with devastating force that financial instability and crises are endemic to capitalist economies and that it is only strong and dynamically changing financial regulations that can keep the damage caused by these crises within bounds The international financial system and individual national economies including that of the United States are suffering from the aftermath of the worst financial crisis since the Great Depression Economists are struggling to understand the origins and implications of the crisis The Handbook of the Political Economy of Financial Crises uses a political economy theoretical framework to analyze the crisis After an opening chapter that describes the dimensions of the current crisis the next section provides relevant theoretical frameworks Subsequent sections apply these theoretical frameworks to analyze the background dimensions and implications of the crisis for the world economy Leading scholars push forward our understanding of how and why our international and domestic economies are susceptible to financial breakdown and what can be done to mitigate this problem in the future The methodology throughout applies theoretical concepts in the context of an historical and institutional understanding of the real world By emphasizing the historical and institutional aspects of financial crises the authors advance economic knowledge and provide insights into how we can manage our financial system to improve the lives of ordinary people
